

STEPS

1		<p>Turn the hydraulic pump(2#) upside down, remove the 6 pre-assembled bolts, and place the base(1#) on the top. Align the holes and tighten the 6 bolts.</p>
2		<p>Before assembling foot pump(7#), you need to release safety screw out half way.</p>
3		<p>Locate the foot pump(7#) and place it in the hydraulic pump (2#). Then re-fix the safety screw. (Please note foot pump direction)</p>
4		<p>Place seat(3#) onto the hydraulic pump(2#) (please note the pin on the hydraulic pump toward the gap of the pump joint)</p>
5		<p>Before assembling, please take off 8 screws on the side of the back rest (4#)and seat(3#).</p>

6		<p>Connect armrest(5#) to the seat(3#) and back rest(4#) by locking 8 screws halfway (1.In order to adjust the position of barber chair better, please don't screw them tightly at first. 2.please distinguish R armrest and L armrest.)</p>
7		<p>Locate foot rest(8#) to the bottom of the seat(3#) by locking 2 screws tightly.</p>
8		<p>Please make sure the back rest (4#)straight, then locking all the screws tightly and safely.</p> <p>Insert the 8 plastic nuts(7#)to the armrest(5#).</p>

Please note: 1.Some hardware may come pre-assembled on the unit. You may need to remove and re-install during installation process. 2.You can adjust the height of the barber chair by stepping on foot pump(9#).To adjust the barber chair higher, step down foot pump half-way (NOTE: do not step down fully),then the chair will get higher slowly as you step down couple times. To adjust the barber chair lower,step down foot pump fully (NOTE: in order to lower the barber chair,there must be someone sitting on the chair as a weight pushing down the chair.)3.To prevent the seat declining, please lock the foot pump by raising the foot pump to the top.
