ASSEMBLY AND INSTALLATION INSTRUCTIONS

WARNING: TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER BEFORE INSTALLING OR SERVICING THIS FIXTURE.

Before You Begin:

- Ensure power is turned off at the circuit breaker before installation.
- Read all instructions carefully.
- Installation should be performed by a qualified electrician if you are unfamiliar with wiring.

Step-by-Step Installation:

1.Feed the fixture wires through the 160mm connecting rod. Then secure the rod onto the fixture body. Next, pass the two 160mm rods through the two holes at the rectangular frame.
2-6.Feed the fixture wires through the downrod and thread the downrod onto the rectangular frame. Downrod length can be adjusted as needed.
7.Feed the fixture wires through the swivel joint, Then secure the swivel joint onto the canopy (suitable for sloped ceilings).
8.Pass the fixture wires through the canopy, the washer, and the nut. Tighten the nut to secure the canopy onto the swivel joint.
9.Secure the mounting plate inside the junction box using the mounting screws.
10.Wiring Connections
·Use wire connectors to connect the fixture's black (hot) wire, white (neutral) wire to the corresponding wires from the junction box.
·Connect the fixture ground wire to the mounting plate using the green grounding screw, then connect it to the house ground wire with a wire connector.
·Carefully tuck all wires back into the junction box, ensuring no bare wire is exposed.
11-12.Place the canopy over the mounting plate and secure it with the decorative nuts.
13.Install light bulbs (bulbs not included).
14-15.Place the glass shade onto the socket. Then tighten the decorative nut to secure it. Make sure the glass shade sits flat and firm.

Safety Instructions:

To avoid fire, shock, and serious personal injury, follow all instructions carefully.
1. Do not install or use the light fixture if any part is missing or damaged.
2. To avoid possible electrical shock, be sure electricity is turned off at the main fuse or circuit breaker box before wiring.
3. Make certain no bare wires are exposed outside the wire connectors.
4. All wiring must conform to national and local electrical codes.
5. Follow the recommended instructions for the proper method of wiring your new light fixture. If you feel you do not have enough electrical wiring knowledge or experience, have your light fixture installed by a licensed electrician. Any electrical work not described in this manual should be performed by a licensed electrician.
