## STEP 01 Check All Parts

Lay out the fountain basin, top cover, water pump, water hose, light cable, USB power cable and power adapter. Check that all parts are included before assembly.

## STEP 02 Route the USB Cable

Feed the USB cable through the opening in the bottom of the fountain base. Pull enough cable through to reach the power adapter.

## STEP 03 Press the Rubber Grommet into Place

Press the rubber grommet firmly into the opening so it fits snugly around the cable.

## STEP 04 Flip the Grommet Down

Turn the rubber grommet downward and arrange the cable neatly. Make sure it stays securely in place.

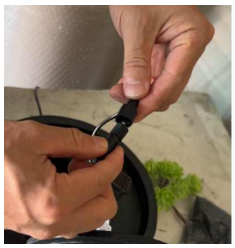

# COMPLETE THE ASSEMBLY

SKU: FF26036 | Finish the connections and install the cover before filling the fountain.

### STEP 05 Connect the Water Hose to the Pump

Locate the water hose on the top cover. Connect its free end to the pump outlet and make sure the hose is firmly seated.

### STEP 06 Connect the Light Cable

Align the light cable connectors and join them. Twist the connector collar clockwise until it is securely tightened.

### STEP 07 Install the Top Cover

Carefully place the top cover onto the fountain body. Align it properly and make sure it sits evenly in position.

### STEP 08 Connect the USB Cable to the Adapter

Insert the USB plug into the supplied power adapter. Check that the connection is fully inserted.

**FINAL STEP · ADD WATER & START**

1. Add clean water until the pump is completely submerged.
2. Check that the hose and light connections are secure.
3. Plug the power adapter into a suitable electrical outlet.

**IMPORTANT**

- Never run the pump without water.
- Keep the pump fully submerged during operation.
- Unplug the adapter before cleaning, maintenance or moving the fountain.

Tip: Refill the basin as needed to maintain the proper water level and keep the pump submerged.
