Assembly Instructions for
Model 785188

NOTE:This product can be installed by following similar steps. If you have any questions, please contact our customers for help.

Dear customer, hello! This assembly diagram is a general assembly instruction for a chandelier with a center column. All chandelier with a center column in this store can be assembled with reference to this diagram. Please refer to the following steps for details.

1. Take out the main line from the main beam bag, peel off the ends of the main line for later use.
2. Place the elbows and separate the red and blue lines in each elbow.
3. Lay the main beam flat, and pass the main line through the round rod in the middle of the center column into the arm support plate.
4. Insert the bent pipes into the reserved holes of the arm support plate in turn.
5. Connect one line of the main line to all the red lines of the bent pipe, and the other line of the main line to all the blue lines of the bent pipe, and screw on the wiring caps respectively.
6. Use a wrench to tighten the screws to fix the bent pipe, cover the arm support plate, and reinstall the decorative ball.

Install the lampshade, remove the plastic fixing ring on the lamp head, put the lampshade on the lamp head, and then clamp the lampshade with the plastic fixing ring to complete the installation.

Unscrew the ball nut that fixes the decorative ball to the arm support plate, remove the decorative ball, and open the arm support plate cover.

Example of assembling a chandelier with a center column.

Your fixture is now assembled and ready to use.
