11		X1
13		X3

Step 23

If the back table sounds too loud when moving up and down, you can both O and M to reduce the noise.

Controller Guidelines

Initialization Operation/Reset	Press and hold the "↓" button. The desktop will begin to move downward. When the controller displays the lowest height value, continue holding the button for 5 seconds. The controller will then display "rES", indicating that the reset process has started. Please continue to wait until the controller displays the minimum height value again, indicating that the reset is complete.
Raise the Desk	Press and hold the "↑" button. The desktop will move upward until it reaches the highest position or the button is released.
Lower the Desk	Press and hold the "↓" button. The desktop will move downward until it reaches the lowest position or the button is released.
Store Position	Press and hold the numeric button (1 / 2 / 3) for 3 seconds. The controller will display H1 / H2 / H3, indicating that the memory position is being set. After 2 seconds, the display will automatically return to the current height value, indicating that the memory height has been saved successfully.
Select Height Setting	Press a number button to recall the corresponding height. The controller will first display the target height value. After 0.5 seconds, the desktop will automatically move to the target position.

Child Lock and Unlock

Press and hold "↑" + "↓" until "LoC" appears to lock the controller. Press and hold "↑" + "↓" again until the height is displayed to unlock.

Error Code Guidelines

Error	description	How to solve it
rES	The LED display flashes "rES"	Reset
E31	Voltage low	Replace the power supply
E32	Voltage high	Replace the power supply
Hot	Overheat	Power off and restart
E10	Motor wire not connected	Check the connection cable
E20	Overload	Reduce the load

If you have any problems installing or using your standing desk, do not hesitate to contact us.

Warning

The manufacturer and seller explicitly disclaim any liability for any personal injury or property damage caused by the user's failure to follow the instructions for assembly, incorrect use, improper maintenance, or unauthorized modification.
