Duvet Covers & Pillowcases & Sheets

We recommend washing your bedding items such as duvet covers, bed sheet, and pillowcases separately at a 40 Degree cycle to protect their softness. To preserve the colours of the product, please wash it with similar colours.

You should not dry clean or bleach cotton bedding as these would damage the fabric. You can tumble dry at low heat and iron your bedding. It's advised you to wash your bedding products before you use it for the first time.

Please keep away from fire.

This duvet cover set is made from 100% natural cotton and is certified free from harmful chemicals according to Oeko-Tex® standards. It is designed to be gentle on the skin, but if you have very sensitive skin or allergies, you might want to do a quick test before using it.
