15	85068	GREEN FELT 1.3x1 METRE	1

Attention:

- For Domestic Use Only.
- Must be built on a **solid and level** base.
- Regularly check that all fixing are tight and secure.
- Regularly check the felt for damage.

Important:

Assembly of this product requires a minimum of two adults.

Please check all parts prior to assembly.

This product is pressure treated to ensure longevity of all timber components and to protect against rot. This may leave a colour difference on some parts that will even out as the moisture content stabilises. This will not need additional treatment.

- Please keep all plastic bags and small parts away from children.
- The roof of this product is not a load bearing structure.
- Timber is a natural material and will shrink and swell as a result of varying moisture content.

Assembly of damaged parts may be deemed to be acceptance and this may affect the remedies you are entitled to. If the product is not constructed in accordance with the instructions, or is altered in anyway (e.g. painted), the manufacturer cannot be held liable for any resulting damage.

A Floor Assembly

C

Fix each of the corner strips along the edges so that they are flush and fix each in place using 4 x nails.

D

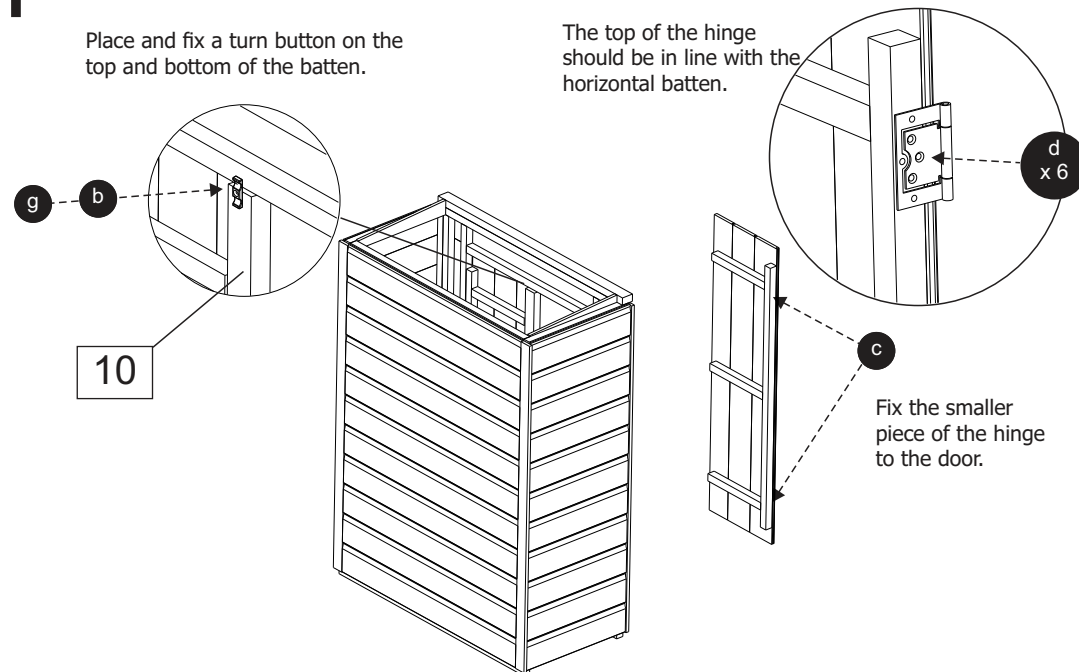

The roof can be positioned so that it slopes towards the back or front.

Place the batten (9) on top of the door end and fix this in place using 3 x 50mm screws.

E

The batten should be fixed so it is tight against the horizontal battens on the reverse of the door and offset 14mm from the top.

F

Place and fix a turn button on the top and bottom of the batten.

The top of the hinge should be in line with the horizontal batten.

Fix the smaller piece of the hinge to the door.

PRE-DRILL 

PRE-DRILL 

G

Fix the roof to the unit screwing down through the OSB sheet into the framing at the front and back using 30mm screws.

**H**

Place the felt over the roof so that there is a 45mm overhang on the front and sides and allow a small overhang at the back. Secure the felt to the roof nailing into the battens from the sides and in 150mm intervals.

Cut and fold the felt at the corners as shown.

Take care when trimming the roof felt.

I

J

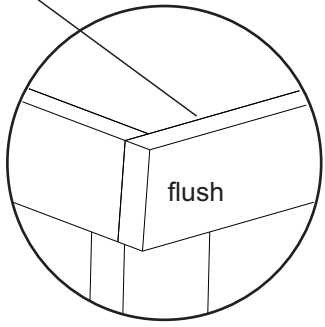

13

Starting with the side Barge Boards first, place each board so that they are in line with the roof and flush at the corners. The front board will overlap the sides.

Fix each board using 30mm nails.

8

Take care when trimming the roof felt.

Position and line up the hasp and staple with framing on the inside of the door.
