①	②	③	④	⑤	Tee	Wheel	Plug cap	Base	Rubber band	Storage rack
6	6	8	4	2	8	4	4	2	8	4

Installation steps

Step 1: take out two No. 2 tubes and insert them laterally into the small hole of the base.

Press down hard

Step 2: be sure to connect the operation method on the drawing, stand up and press hard. Press both ends into 3cm and press in place

Step 3: find out four No. 1 pipes insert them vertically into the base slot, fix them, and take out four black rubber bands to cover the four No. 1 pipes, and fix the shelf to prevent sliding

Step 4: the rack has positive and negative, with the small hole facing up and the large hole facing down

Step 5: find 8 No. 3 pipes and 4 shelves. Connect and assemble together

Step 6: press it vertically and press it in place

Step 7: install the assembled step 6 in four No. 1 pipes, with the small hole of the shelf facing up and the large hole facing down

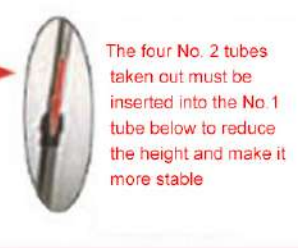

Step 8: take out two No. 5 pipes and four tee connections and combine them

Step 9: connect the assembled step 6 to the four No. 1 tubes

Step 10: insert 4 No. 2 pipes into No. 1 pipe on the tee, adjust the required height and tighten the nut

The four No. 2 tubes taken out must be inserted into the No. 1 tube below to reduce the height and make it more stable

Step 11: take out four tees and install them on pipe 2

Step 12: take out two No. 1 pipes and connect them to four tees

Step 13: insert four No. 4 tubes into the tubes corresponding to step 12 and cover with four black protective covers

Step 14: in the last step, the four wheels are inserted into the small hole on the base and the installation is completed

Note: if you buy the wheel, please install the wheel and insert it directly into the hole under the base

During the installation process, because the nozzle is relatively sharp, it shall not contact the front of the nozzle as much as possible. To avoid scratching, try to hold it on the pipe wall
