ASSEMBLY AND INSTALLATION INSTRUCTIONS

WARNING: TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER BEFORE INSTALLING OR SERVICING THIS FIXTURE.

Before You Begin:

- Ensure power is turned off at the circuit breaker before installation.
- Read all instructions carefully.
- Installation should be performed by a qualified electrician if you are unfamiliar with wiring.

Step-by-Step Installation:

1-5.Assemble the fixture to your desired height using the provided downrods and swivel joint, tightening all connections securely.
6-7.Align the set screws on the swivel joint to face the same direction. Mount the canopy onto the threaded stud of the swivel joint.
8-12.On the stud, place the reinforcement plate, followed by a flat washer, the ground wire (on either side), and a lock washer. Secure the assembly with a nut and tighten firmly to prevent loosening.
13.Using wire connectors, join the driver's red wire (Line) to the fixture's black wire (Line). Connect the driver's black wire (Neutral) to the fixture's white wire (Neutral).
14-15.Secure the mounting bracket to the junction box using the provided machine screws.
16.Wiring Connections
·Use wire connectors to connect the fixture's positive wire, negative wire to the corresponding wires from the junction box. Connect the ground wires to the grounding terminal.
·Ensure no exposed conductors remain outside wire connectors or outside the junction box.
17.Attach the fixture's ground wire to the mounting bracket using the green grounding screw. Then, connect the house ground wire to the fixture's ground wire using a wire connector. Carefully tuck all wires back into the junction box.
18.Secure the canopy to the installed machine screws using the provided finial nuts (18).
19-20.Hang the short and long glass panels in sequence onto the designated hooks on the fixture.

Safety Instructions:

To avoid fire, shock, and serious personal injury, follow all instructions carefully.
1. Do not install or use the light fixture if any part is missing or damaged.
2. To avoid possible electrical shock, be sure electricity is turned off at the main fuse or circuit breaker box before wiring.
3. Make certain no bare wires are exposed outside the wire connectors.
4. All wiring must conform to national and local electrical codes.
5. Follow the recommended instructions for the proper method of wiring your new light fixture. If you feel you do not have enough electrical wiring knowledge or experience, have your light fixture installed by a licensed electrician. Any electrical work not described in this manual should be performed by a licensed electrician.
