Installation

1 ATTACHING THE MOUNTING UNIT TO THE JUNCTION BOX

Remove the two pre-assembled screws and washers from the mounting bracket (AA).

Screw the outlet box screws (BB) through the holes on the mounting bracket (AA) into the screw holes on the outlet box.

2 MAKING THE ELECTRICAL CONNECTIONS

Connect the copper wire from the light fixture (A) to the mounting bracket (AA) by securing it with the pre-installed ground screw.

Connect the black wire from the fixture to the black wire from the outlet box, the white wire from the fixture to the white wire from the outlet box, and the copper wire from the fixture to the ground wire from the outlet box with the wire nuts (CC). Secure with electrical tape (not included).

NOTE: If the wires from the fixture are the same color, attach the side with markings or letters to the black (positive) wire and the other to the white (neutral) wire.

Put the fixture body (A) over the mounting bracket (AA).

Secure the light fixture with two previously-removed screws and washers.

CAUTION: To avoid any waterproofing problems, please make sure the light fixture fits the mounting surface perfectly during installation and use waterproof glue around the canopy for better sealing after installation.
