

FEATURES

- Panels are each 4mm thick with 3 layers; a sandwich of thick aluminum on both the surface and back with a strong mineral resin core in the middle for strength.
- Technical qualities provide for strength and stability, with a structure that is highly water resistant.
- Each design has 5 random patterns for a very natural marble or stone look.
- Panel designs are also available as a matching book-matched pattern. These unique designs are reversible thereby creating two different possible book-matched patterns with the same 2 panels.
- Surfaces are highly scratch resistant and are available in 2 different finishes; super high gloss and honed. Concrete panels come with a realistic textured finish.
- Panels are extremely lightweight, weighing 1.3 lbs/sq. ft. for easy installation and handling.
- Fabrication is done with regular carbon steel tools, using a circular saw and an aluminum cutting blade.
- Panels can be used either in the shower or on bathroom or other room walls for a luxurious natural stone look.

OPTIONS

- Storage pods & caddies, grab bars, storage shelves, shower seats & benches are available to coordinate with the walls.

Single Wall Panel Models
