User's Guide

A21

Thank you for purchasing this product.
Please use if the product works normally after connecting to power.

Introduction

The box is an intelligent controller.

It has 1 USB-A output port 1 Type-c output port and 2 socket.

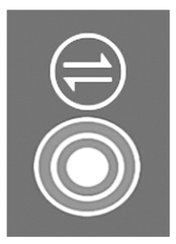
With 2 touch buttons, it can turn. ON/OFF the light,adjust the light luminance, and change light colors.

Operation

This touch button is used to turn on/off, and adjust brightness.

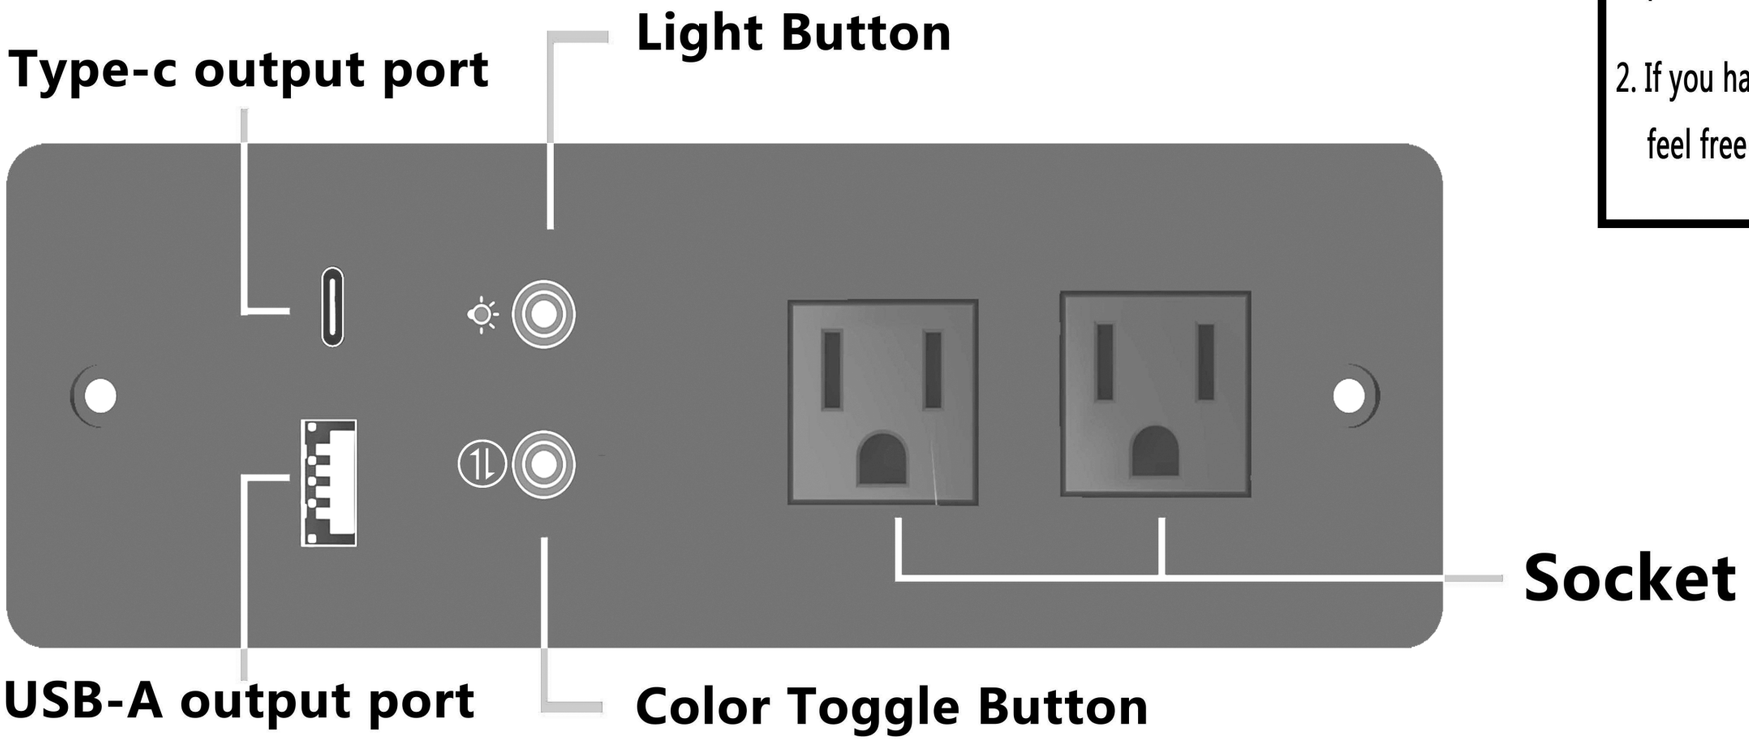
A. Short touch ->lighting on ->short touch ->lighting off(It stays as it was before the last time the lights went out).

B. Long touch -> adjust the luminance.



This touch button is used to change colors.

When the light is turned on, press this button to realize the three-color switching function , and this touch key is invalid when the light is not turned on.



ATTENTION PLEASE

1. If there is no touch response suddenly, Re-plug the power to reset the touch static electricity.
2. If you have any questions when installing, please feel free to contact us. Thank you.
