

Owner Manual

Daily Care

- Dust the surface with a soft, dry microfiber cloth.
- Use coasters to prevent heat marks and water rings.

Spill Management

- Blot liquids immediately—never rub.
- For sticky residue, wipe with a cloth dampened in mild dish-soap solution; dry thoroughly.

Wood Conditioning (Every 6–12 Months)

- Apply a clear, food-safe furniture oil or wax; buff off excess to maintain the low-sheen finish.

Hardware Check

- Re-tighten cam bolts one month after assembly, then yearly.

Environment & Placement

- Maintain indoor humidity 40–60 % to minimise wood movement.
- Avoid prolonged direct sunlight or placement over heat vents.
