## Channelled Bedrock Grey 1

D1461S29214-2386

Channelled Bedrock Grey is an exemplary work on paper that recalls the Modern Art period of the 20th century. Patterns and shapes define this work with the repetition of muted ovals and bold dot-like marks that also lend depth to the piece. Texture is perceived from an overlay of scratch markings. A narrow, yet striking palette in sand, river-rock grey, and onyx provide the perfect balance to this work.

Abstract forms in grayscale break up a background of subdued geometric shapes in Channelled Bedrock Grey. An exclusive work of art for ART by TA.
