Package Included

1* Hot Water Dispenser

1* Fuel Tray

Other Accessories for Assembly

Application

It is applicable to holding milk, coffee, juice, tea, soybean milk, and other hot or cold drinks at your home, hotels, restaurants, or parties.

Notes

1. Please check the size carefully before ordering.
2. Please do not use any acidic cleaners or wire wipers to clean it, and be careful not to touch the urn body when filling hot drinks. Please wash it with boiling water several times before use, clean it as soon as possible after use, and dry it in a cool place. Please avoid collisions, drops, and strong impacts, so as to avoid product deformation, affecting the appearance and use effect.
3. The product can be heated with an alcohol stove, so the faucet is designed to be higher, and the remaining drinks need to be removed by slightly tilting the barrel to prevent dry burning, please make sure you don't mind before purchasing.
4. After heating at high temperature, please do not touch it directly with your hands to avoid scalding.
5. Please allow the slight color difference caused by the shooting light and 1-3cm error due to manual measurement, and make sure you do not mind before you order.
