

## THANK YOU FOR YOUR PURCHASE

Thank you for purchasing this quality product. To ensure correct function and safety, please read and save all instructions before using the product

### SAFETY TIP

1. Installation work and electrical wiring must be done by qualified person(s) in accordance with all applicable codes and standards (ANSI/NFPA 70), including fire-rated construction.
2. Read all instructions and safety information carefully before installing your fan and save these instructions.
3. To avoid possible electric shock, turn off the electricity at the main fuse box or circuit panel before you begin the fan installation or before servicing the fan or installing accessories.
4. Make sure you have a location selected for your fan that allow clear space for the blades to rotate, and at least seven (7) feet of clearance between the floor and the fan blade tips. The fan should be mounted at least thirty (30) inches from walls or other upright structures.
5. **WARNING:** The outlet box and ceiling support joist used must be securely mounted, and capable of supporting at least 100 pounds. To reduce the risk of fire, electric shock or personal injury, mount to the outlet box marked acceptable for fan supported and use mounting screws provided with the outlet box. The box must be supported directly by the building structure.
6. **WARNING:** To reduce the risk of fire, electric shock or personal injury, mount to outlet box marked "acceptable for fan support" and use mounting screws provided with the outlet box most outlet boxes commonly used for the support of lighting fixtures are not acceptable for fan support and may need to be replaced. Consult a qualified electrician if in doubt.
7. Electrical diagrams are for reference only. Light kits that are not packed with the fan must UL listed and marked suitable for use with the model fan you are installing. Switches must be UL general use switches. Refer to the instructions packaged with the light kits and switches for proper assembly.
8. After installation is complete, check that all connections are absolutely secure.
9. After making electrical connections, spliced conductors should be turned upward and pushed carefully up into outlet box. The wires should be spread apart with the grounded conductor and the equipment-grounding conductor on one side of the outlet box.
10. **WARNING:** To reduce the risk of electrical shock and fire, do not use this fan with any solid-state fan speed control device, or rheostat.
11. Do not separate the reverse switch until the fan has come to a complete stop.
12. Do not insert anything into the fan blades while they are rotating.
13. **WARNING:** To reduce the risk of personal injury, do not bend the blade brackets (also referred to as "flanges") during assembly or after installation. Do not insert objects in the path of the blades.
14. To avoid personal injury or damage to the fan and other items, be cautious when working around the fan or cleaning the fan.
15. Do not use water or detergent when cleaning the fan or fan blades. Dry dust cloth or lightly dampened cloth will be suitable for most cleaning.

**NOTE:** The important safety precautions and instructions appearing in the manual are not meant to cover all possible conditions and situations that may occur. It must be understood that common sense and caution are necessary factors in the installation and operation of this fan.

**NOTE:** This product is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities are different or are impaired, or lack of experience or knowledge, unless such persons are supervised or trained to operate the appliance by a person responsible for their safety.

**NOTE:** Children should be supervised to ensure that they do not use appliances as a toy.

# 2.4G DC Fan Lamp Controller Specifications

## Product Introduction:

This product uses 2.4G wireless digital remote control technology, remote control one-to-one control, simple and convenient operation, strong anti-interference ability.

## Remote control matching code:

Turn on the power and press and hold the light switch button for a long time within 5 seconds of the light on, When you hear a beep or a light flashes, the code match is successful. If you need to match the code a second time, you need to wait 30 seconds before turning on the power and repeat the above operation.

### CAUTION:

The electronic switch is not an isolated product and needs to be operated by professional personnel during installation.

The electronic switch is triggered by the remote control, and the wireless frequency of the remote control transmitter is 2.4GHz.

# APP operation

Fan light pro

1. Download the APP scan the QR code → open the browser → select the version to download
2. Open the APP → select a room → Click on  → select "fan light" → enter the equipment name (such as fan light) → OK  
**(Note: You need to start your phone's Bluetooth before APP matching.)**

3. Click on  enter

1. Language (Chinese and English can be selected)

2. Scan (scan the other party's QR code to share device control)

3. My QR code (you can share it with the other party)

4. Room management (room name can be added)

5. Instructions (Choose the second interface fan light, instructions for using various symbols of the device)

6. Check for updates

7. Feedbackpoint to enter

# APP button function description:

1.  Code matching button (click this button within 5 seconds of turning on the light, such as the light source flashing or the buzzer "di", it proves that the pairing code is successful;if the pairing code fails, repeat this operation).
2.  After clicking, you can choose a time to turn off the device regularly.
3.  After clicking, the wind blown by the fan is like the wind in nature.
4.  The wind blown by the fan after clicking is suitable for sleep.
5.  After clicking, the fan will rotate in the reverse direction.
6.  Click to change the direction of the wind.
7.  After clicking, the fan will rotate forward.
8.  After clicking, the white light and yellow light will light up at the same time, but the brightness is only 10% of the maximum brightness.
9.  After clicking, the white light and yellow light will light up at the same time, and the brightness is the maximum brightness.
10.  After clicking, only the yellow light will light up, and the brightness is the maximum brightness.
11.  After clicking, only the white light will light up, and the brightness is the maximum brightness.
