Notice and Tips

Before Use

- After the vacuum compression was opened, the mattress was slightly wrinkled, and the unevenness was normal.
- Please do not place the mattress in an ultraviolet or high temperature environment. High temperature will soften the inner foam and affect the rebound.
- Our mattress has been certified by CertiPUR-US to be free from all harmful chemicals. If there is a slight odor, don't worry, it's normal for a new foam. Airing out the mattress for 72 hrs will be helpful.

Maintenance

- There might be very slight depression in the mattress after long term use, which is a normal phenomenon.
- It is recommended to rotate it at 180° every six months to extend its lifespan.
- Single point jump, fixed point pressure or sitting on the edge for a long time may cause uneven stress, and shorten the life time of the mattress.

Why choose Mattress?

CertiPUR-US® certified

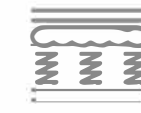

CertiPUR-US certified foam indicates that mattress is free from harmful chemicals

Memory Foam

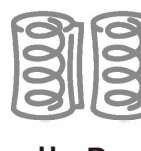

Memory Foam provides good support that conforms to the curves of your body and is excellent at helping relieve pressure for a more restful sleep.

6

Hybrid Mattress

Hybrid mattress combines the advantages of traditional spring mattress and memory foam mattress, creating an optimum balance of comfort and support.

Individually Pocket Coils

Each individually wrapped pocket coil works independently to lessen the motion transfer from your sleep partner, allowing you to enjoy an undisturbed sleep.
