Coffee table Assembly Instructions

1. Install the pre-prepared anti-slip rubber sleeves onto the screw holes at the bottom of the storage iron box to protect your floor from damage.

2. Position the desktop panel on the ground or a flat surface with the back facing upward. Next, place the storage iron box (ensuring the screw hook is oriented correctly) within the designated circle on the desktop panel. At this stage, confirm that the reserved circle on the desktop panel fully encompasses the diameter of the storage iron box. Use a marker or pen to indicate the screw holes, and then secure the box in place using screws.

3. Align the two legs with the designated holes and rotate them to the right to complete the installation.
