

outdoor fabric care guide

UPON RECEIPT

Items are shipped in a compressed state. Please allow 48 hours for the product to expand.

REGULAR CARE

Keep cushions dry and out of the elements (sunlight, rain, snow, etc.) whenever possible. Storing in a cool dry place when not in use will extend the life of the cushion. Should cushions become rain soaked, hang dry or set cushions on end as quickly as possible prior to next use.

WASH INSTRUCTIONS

Prior to washing, brush off loose dirt. **SPOT CLEAN ONLY**, using a mixture of 1 gallon warm water to ¼ cup clear, mild liquid detergent using a sponge or soft bristle brush. Rinse thoroughly. For troublesome spots, let the solution sit for 15 mins before rinsing.

For mildew and deep stains, you may try ½ to 1 cup of chlorine added to the water/soap solution. Use sparingly, and only if necessary, as bleach weakens fabric fibers and can negatively affect fabric color.

DO NOT

Dry clean, use aggressive detergents, wash in a machine washer, iron, or tumble dry.
