

INSTALLATION GUIDE

1 Preparation before Installation

Inspection of Parts and Accessories:

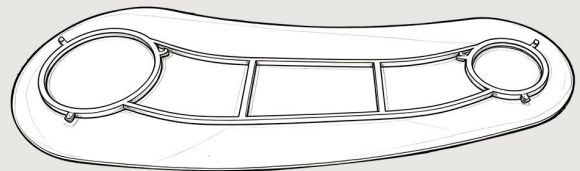

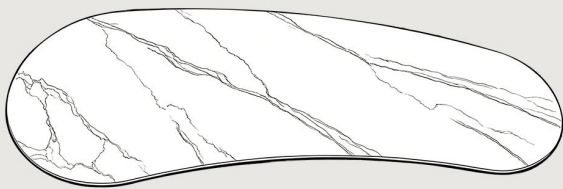

Ensure that all parts and accessories are complete.

The main parts include one tabletop and two bases.

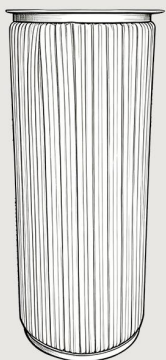

The accessories consist of eight black foot pads and one golden wrench.

The accessory pack is placed inside the drawer.

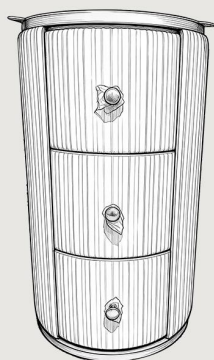

Please check the drawer carefully to make sure no accessories are missing.

Foot mats * 8

2 Base Installation

Step1. Remove the Nuts:

Locate the metal rings that fix the bases on both sides.

Use the golden wrench to unscrew the golden nuts on the metal rings.

Please place the unscrewed nuts properly to avoid loss.

Step2. Align the Bases with the Tabletop:

Invert the bases and place them on the tabletop.

Carefully align the positions to ensure that the bases and the tabletop are accurately positioned.

This step is crucial, as inaccurate installation positions may affect the stability and appearance of the final product.

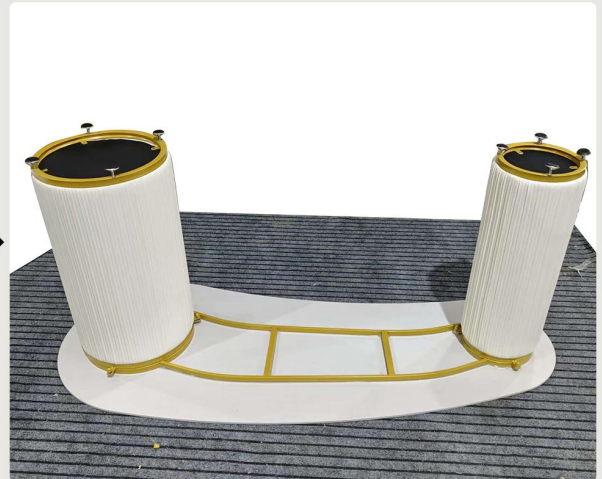

2 Base Installation

Step3. Tighten the Nuts:

After the bases and the tabletop are properly aligned, use the golden wrench to retighten the nuts that were unscrewed previously to secure the bases. Repeat these steps for both bases.

3 Foot Pad Installation

After the installation of the two bases is completed, install the black foot pads on the feet of the bases.

The black foot pads can not only prevent slipping but also be used to adjust the balance when the tabletop is uneven.

Install the foot pads at the corresponding installation positions on the feet of the bases and ensure they are firmly installed.
