CARE CLEANING AND MAINTENANCE

- The best and safest way to clean your mirror is by using warm water and a soft, lint-free cloth.
- Wring water from the cloth before wiping the mirror to avoid excess moisture.
- Keep bathrooms well ventilated.
- Avoid using cleaners that contain ammonia or vinegar - these can cause corrosion on the edges of the mirror. Never use abrasive cleaners.
- If your mirror sits directly on a vanity, avoid having excess water puddle along the bottom of the mirror.
- Avoid spraying cleaners directly onto the mirror.
