Care and Maintenance:

Add 1 to 2 tablespoons of white vinegar (or you can use a small amount of non-abrasive dish soap – mild detergent soap) to a bowl of warm water and mix well.

Take a clean, soft cloth and moisten it in the water mixture.

Wipe the table with the moistened soft cloth. The vinegar and/or soap will help to disinfect.

Wipe the table again with a clean and dry cloth.

It is important to dry the table to prevent any moisture from soaking into the wood, which may cause it to warp or crack.
