

Installation & Assembly

Screwdriver
(Not included)

(Included)
Allen Wrench

2 - People

EASY → DIFFICULT

The Assembly Rating is a 5-point system showing the level of effort needed to assemble a specific product.

CHECK BEFORE STARTING

Are you missing anything?

Double-check all parts, hardware and accessories listed on Page 6 are accounted for.

Check out our Quick Tips!

We recommend reviewing the pre-assembly handouts. Even experts need a refresher now and then!

Should we send any replacements?

Are there any irregularities or flaws in the parts? We can send replacements!

Prep Time!

Please review the assembly instructions and all diagrams prior to assembling. Arrange parts as recommended on Page 7 and group identical hardware together to make assembling easier.

PRE ASSEMBLY INTRODUCTION

We understand building ready-to-assemble furniture can be a challenging experience for some. To help avoid confusion, we have provided some helpful tips that may speed up the process.

Teamwork

ALWAYS have at least two people to help with transporting and assembling the product to avoid potential injury and/or damage.

Suitable Location

Assembling near the area of the intended location is highly recommended.

Sufficient Space

Make sure you have enough space to move around during the assembly.

Avoid Scratches

Use cardboard, blankets or a carpeted area while assembling furniture to prevent to prevent scratches and damages.

Flat Surface

Make sure the furniture rests on a flat and level surface with each leg evenly touching the floor.

ASSEMBLY AND CARE ADVICE

FAILURE TO FOLLOW THE GUIDELINES BELOW MAY RESULT IN INJURY AND/OR PROPERTY DAMAGE.

Position each part correctly and insert screws or bolts into their respective holes.

Turn clockwise to tighten and only tighten when step is completed or when instructed to do so.

Use the appropriate hand tools or power tools for assembly. Select steps, such as tightening screws and/or bolts, may require hand tools to avoid causing damage during assembly.

Save the instructions and store any supplied tools for later maintenance.

After two weeks, check and tighten any loose hardware and repeat again every six months thereafter.

IT IS THE USER'S RESPONSIBILITY TO MAINTAIN THE FURNITURE. THE HARDWARE MAY LOOSEN OVER TIME AND MAY CAUSE THE FURNITURE TO BE WOBBLY AND UNABLE TO SUPPORT ITS INTENDED WEIGHT CAPACITY. THIS MAY LEAD TO COLLAPSE AND MAY CAUSE SERIOUS INJURY.

CAMLOCK FASTENER ASSEMBLY INSTRUCTIONS

Note: Every cam lock bolt must have a cam lock connector in order to fasten the parts together.

- (1) **Secure the threaded end of the cam bolt by using a screwdriver.**

Turn right (clockwise) to tighten.

Align the cam connector with its side opening (or arrow) pointing to the small drilled hole.

- (2) **Insert the cam lock bolt into the pre-drilled hole above the cam connector.**

- (3) **Two parts should fit snugly against each other.**

- (4) **Turn right (clockwise) to tighten.**

Turn the cam connector with a screwdriver until it will not turn any more with light to moderate force.

CORNER BOOKCASE

- Please keep instructions for future reference.
- Check the quantity and irregularity of parts and hardware before you start.

SAFETY STRAP TO PREVENT TIP-OVER

SAFETY STRAP TO PREVENT TIP-OVER

Drywall: Select a location where you want the table to be mounted. Place the assembled table against the wall and, on the wall, mark the location where the anchor will be placed. Drill a hole slightly smaller than the size of the screw. Push the anchor as far as it will go with your finger. Tap gently with a hammer until the anchor is flush with the wall surface. Secure the strap using a Phillips screwdriver to tighten the screw through the strap and into the anchor. On the other end of the strap, secure it using a Phillips screwdriver to tighten the screw through the strap and into the back of the table.

If the location happens to be a wood stud, do the following:

No anchor will be needed if securing to a wood stud. Drill a hole slightly smaller than the size of the screw. Secure the strap using a Phillips screwdriver to tighten the screw through the strap and into the wall (wood stud). On the other end of the strap, secure it using a Phillips screwdriver to tighten the screw through the strap and into the back of the table.

Before strapping, make sure the table is rested on a flat surface and does not feel loose or wobbly. If it does, double check that the bolts/screws are secured and properly tightened.

ASSEMBLY IS COMPLETED
