# Assembly Instructions

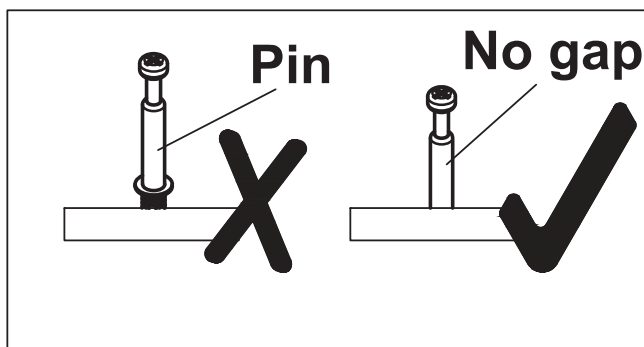

## Installation of Cams and Pins

1. Screw the pin into the hole. To set the cams correctly, make sure the arrow on each cam points toward the pin it will lock onto. Lock the cam by turning the cam head with a screwdriver until it is fully tightened. Do not use an electric screwdriver on the cam and pin assembly.
2. Read each step carefully before beginning. It is very important to follow the instructions in the correct order. Failure to do so may result in assembly difficulties.

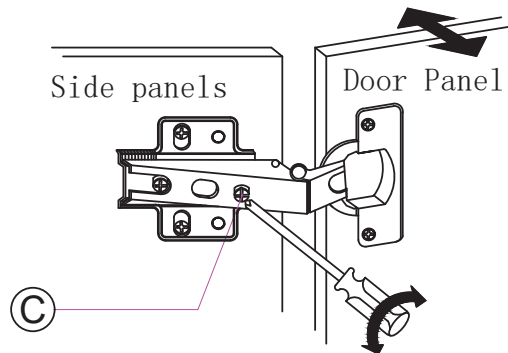

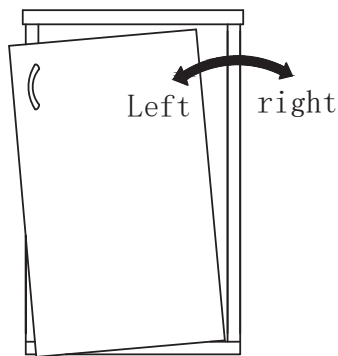

Read each step carefully before starting. It is very important that each step of instruction is performed in the correct order. If these steps are not followed in sequence, assembly difficulties will occur.

## Door hinge adjustment method

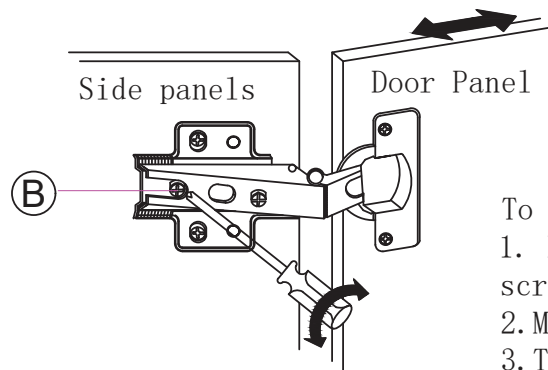

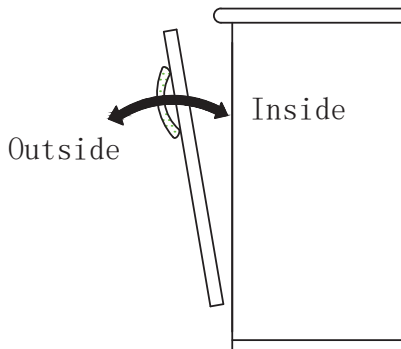

### Method 1:

Move the door left or right:

1. Rotate the C screw with a screwdriver clockwise to move the door panel to the left
2. Rotate the C screw counterclockwise with a screwdriver to adjust the door panel to move to the right

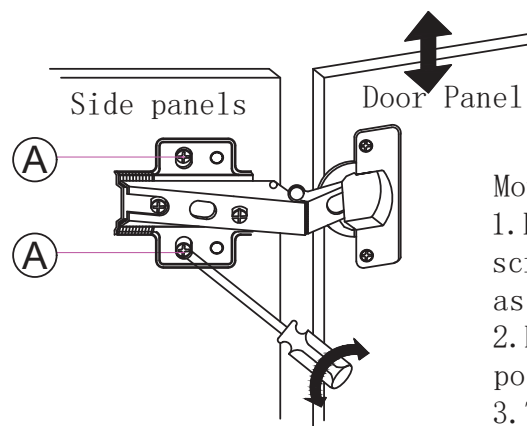

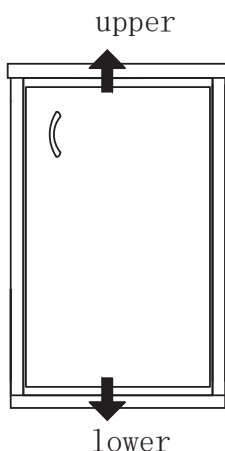

### Method 2:

To move the door in or out:

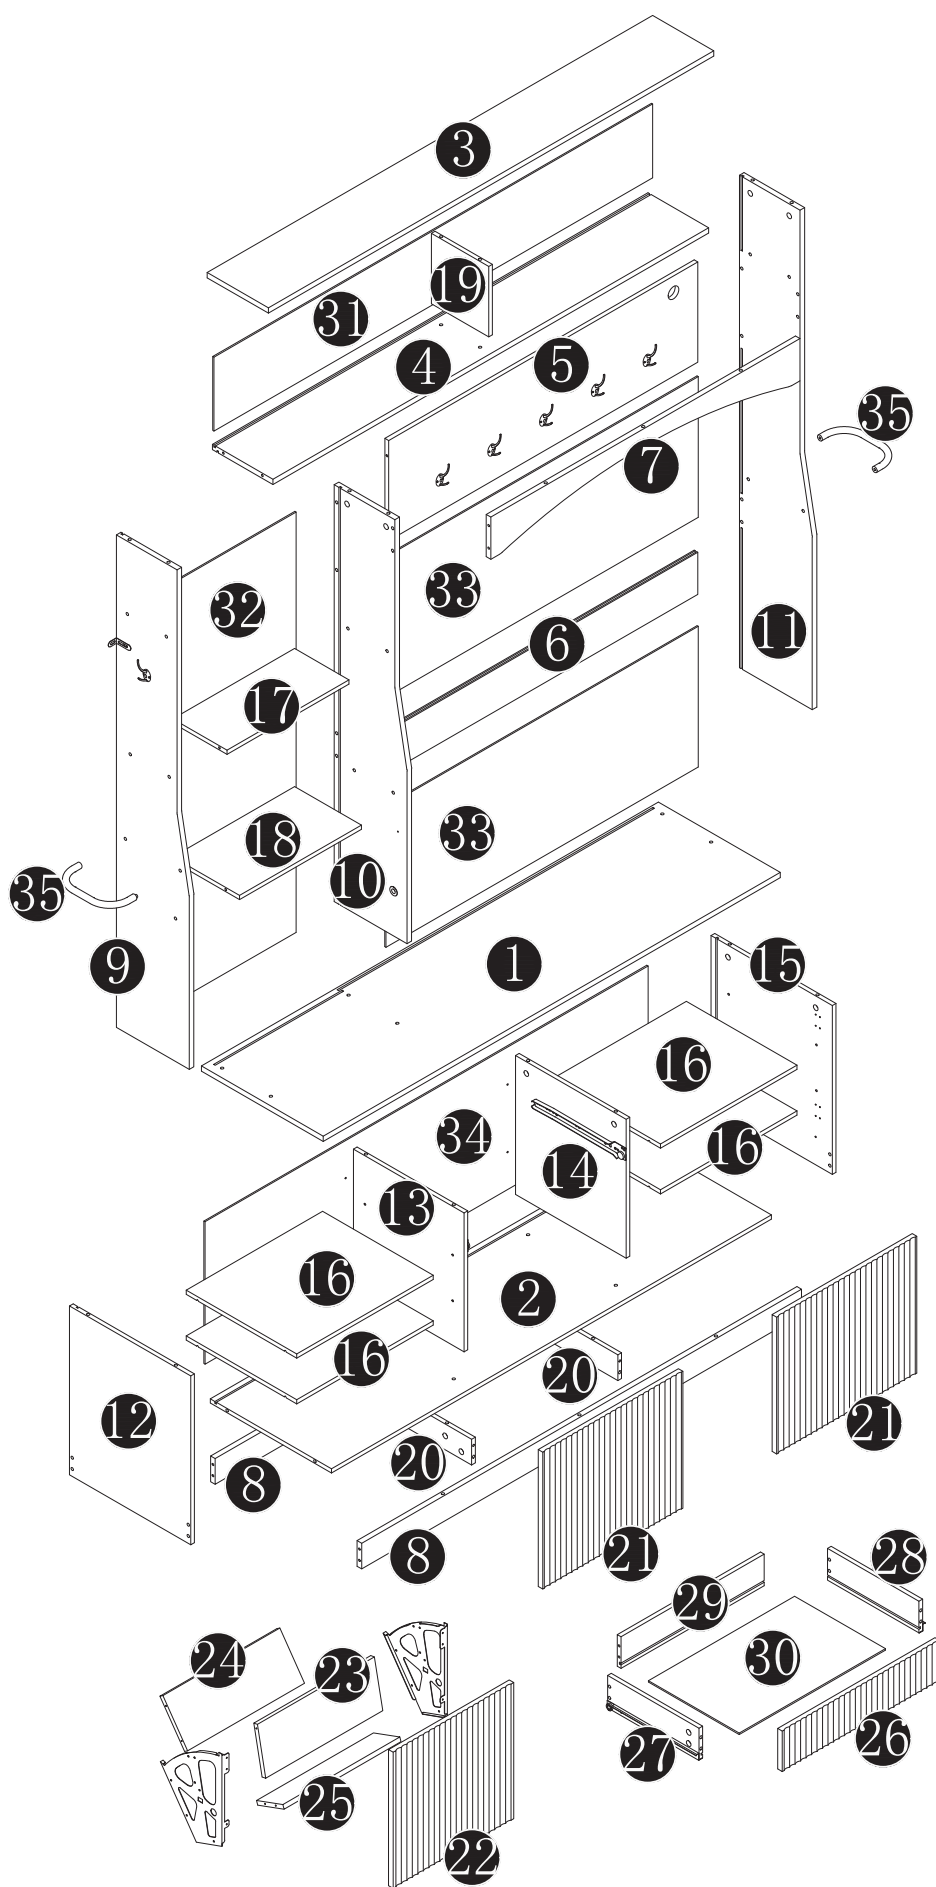

1. Loosen screw B using a screwdriver, as shown in Figure
2. Move door to proper position
3. Tighten the screws again

### Method 3:

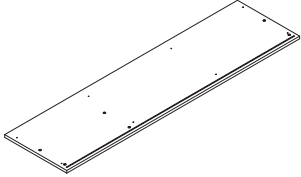

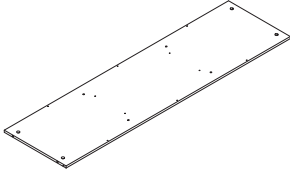

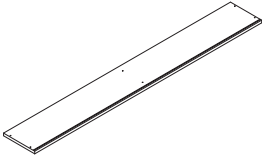

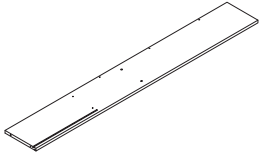

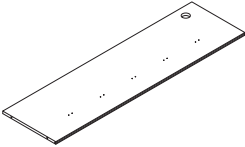

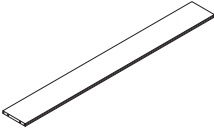

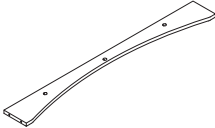

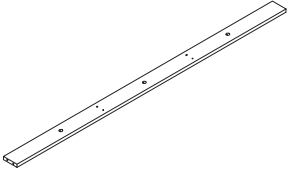

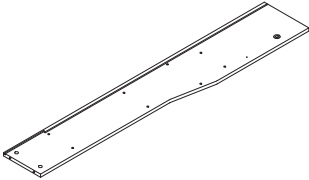

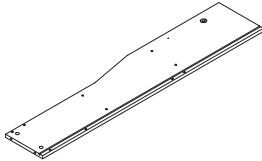

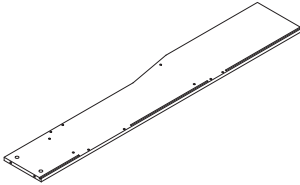

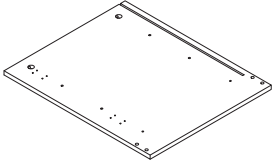

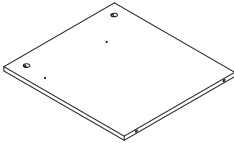

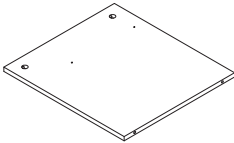

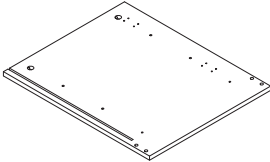

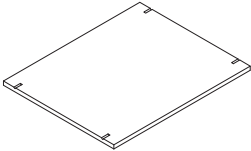

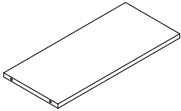

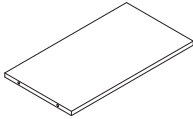

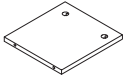

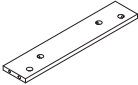

Move the door up and down:

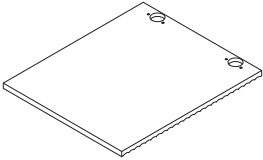

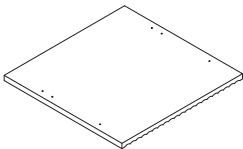

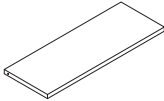

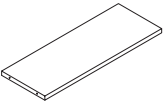

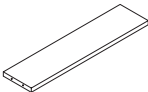

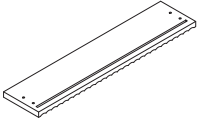

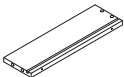

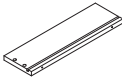

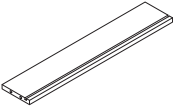

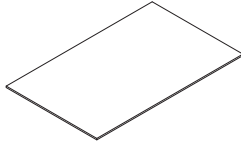

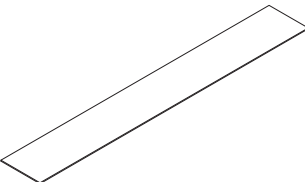

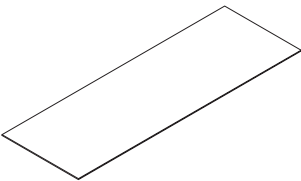

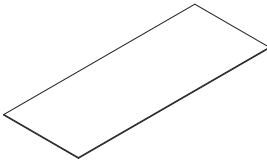

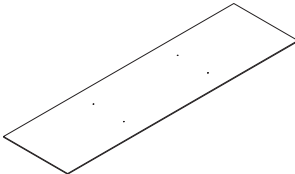

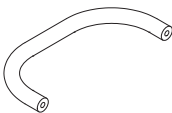

1. Loosen the top and bottom screws A using a screwdriver, as shown in Figure
2. Move the door to the proper position and align the door
3. Tighten the screws again
