

SOLAR WATER FOUNTAIN

SAFETY INSTRUCTIONS

- Always position in direct sunlight for best charging.
- LED lights are not replaceable.
- Lay back and relax whilst listening to the soothing sound of running water.
- Solar powered fountain.
- The water trickles down from each tier of the fountain creating a wonderful soothing sound and then recycles back into the fountain again.
- Simply place the fountain in a well lit area of your garden and enjoy.
- Made from weather resistant poly resin.

SPECIFICATION

The Battery: LI-ION7.4V/2200MA

The Size of Solar Battery: 90MM x 43MM

The Power of Pump: DC4.5-12V, 0.8-6W

Max Flow Quantity of Pump: 300L/H

Max Water Height of Pump: 100cm

INSTALLATION INSTRUCTIONS

- Attach the pump to the solar panel before use, plug the sprinkler head or hose into the outlet of the pump. Make sure the water level covers the pump, but is lower than the sprinkler head.
- Plug the power line of the pump into the plug of the solar panel, and then fasten.
- Position the solar panel in full sun to optimally run the pump, press on the switch at the back of the solar panel, the backup battery will be charged from the solar panel during normal operation and automatically run the pump with out sunshine.
- If required, the pump can be run by the battery in times of low sunlight. Press on the switch at the back of the solar panel. If the battery is fully charged the pump will start to work immediately. It can be charged with the solar panels, battery status: Red: needs to be charged; Orange: half charged; Green: fully charged, when the led light is red or orange, it indicates that it needs to be charged.

ASSEMBLY DRAWING

ON: Battery works automatically and the pump works.

OFF: If the switch is off, the battery and pump will not work.

Plug the power line of the battery into the plug of the solar panel, and then fasten, the battery will work.

These three lights show the battery status:

Red: needs to be charged;

Orange: half charged;

Green: fully charged,

when the led light is red or orange, it indicates that it needs to be charged.

Notes

1. If there is no water, disconnect the pump from the battery and solar panel, running the pump dry will reduce the life of the pump.
2. If the fountain is not used or before transport, please disconnect the pump from the battery.
3. Periodically clean the pump filter after using for long periods of time.
