# 5-PIECE ROMAN BORDER FENCE

Read this manual carefully before use and save it for future reference.

2-PERSON
INSTALLATION
RECOMMENDED

INSTALLATION

Assistance may be required to ensure the panels remain linked during installation.

Insert the hook ends of the first fence panel into the holes on the second fence panel.

Evenly insert the joined panels into the ground, ensuring the panels remain linked.

Take care when installing the remaining sections to ensure the hook ends remain in the holes.

General Use & Care

INSTALLATION: Install into firm soil, installing into loose soil may cause the fence to lean or tip over. Do not install fencing into rocks, sand as it may damage the finish.

CLEANING: Wet a soft cloth with clean water and wipe away dirt and debris.

SCRATCHES: The powder coating on the fencing is tough & durable but, even under normal use, some scratching is inevitable. Scratches can be repaired with a rust-resistant paint. **NOTE:** the one-year warranty does not cover defects or damage caused by painting and/or repairs.

WINTER CARE & STORAGE: Storing this item during winter, especially in locations with ice and snow is highly recommended. Move it to an indoor location that is cool and dry. Covering with a breathable cover while in storage will to help prevent dust build-up.

Troubleshooting

THE FENCE POST WON'T GO FAR ENOUGH INTO THE GROUND

• Make sure there are no obstacles within the soil such as rocks, tree roots, or pavement.

• The soil may be too dry. Soak the soil with water and try inserting the panels again.
