

INSTALLATION STEPS

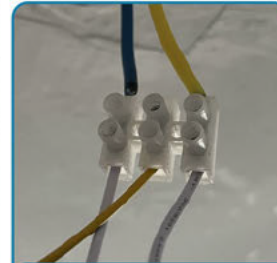

Remove the suspension plate and screws from the chassis

01

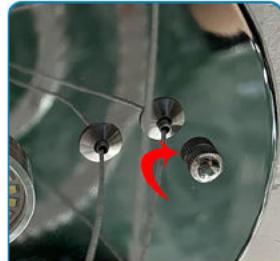

Secure the suspension plate to the ceiling

02

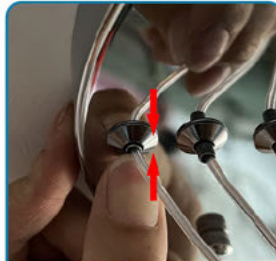

Connect the wires (pay attention to the N and L lines)

03

Hang the light on the suspension plate and tighten it with screws

04

Cut open the fixed knot on the suspension cord, press the tension buckle, and adjust the suspension cord to the desired height and angle for each loop

05

Installation is complete.

⚠ Notices

- Ensure that all wires are properly connected
- Test the light fixture to ensure it is functioning correctly before installing it on the ceiling
- Do not turn on the power until the installation is fully assembled. We recommend professional installation
