User's Manual

Bed

I. Precautions Upon Receiving the Product

(1) Inspection before unpacking: Check whether the outer carton is severely damaged, collapsed, soaked, or punctured. ⚠ If the outer box is severely damaged, please take photos immediately and contact customer service right away.

(2) Accessories List check: Please cross-check the product component numbers listed in the manual against the actual components received. Each part has a corresponding label. Please locate all parts before assembling.

(3) Handling abnormalities: If you find missing parts, incorrect parts, or breakage caused by shipping, please do not return the product yourself. Instead, take photos of the following: the outer packaging box, close-up photos of the damaged part(s), and the part number label. Send these to customer service so we can provide a resolution.

II. Electrical Safety

(1) Voltage and power specifications: Reading light: 3W; LED strip: 24W

(2) Waterproof warning: The USB and Type-C ports are not waterproof. Avoid liquid splashes.

(3) Cleaning requirements: Disconnect the power supply before cleaning. Wipe with a dry cloth.

(4) Protection for the reading light and LED strip: Do not forcibly bend the reading light's flexible tube, as this may cause internal breakage and prevent normal illumination. When using the LED strip, do not pull, apply heavy pressure, cut, or extend it.

(5) USB and Type-C port usage: These ports are for low-power devices only. Do not connect high-power electrical appliances.

III. Assembly and Structural Safety

(1) Maximum load capacity: 1500 lbs

(2) Bed slat installation:
Ensure all bed slats are evenly supported with no gaps, to prevent breakage. Do not modify, remove, cut, or reduce the number of slats.

(3) Moving the bed: When relocating, lift the entire bed frame. Do not drag it from one side only, to ensure long-term durability and proper use.

IV. Materials and Maintenance

(1) Fabric cleaning: Removable covers: Machine-wash in cold water, do not bleach, and dry in the shade. Non-removable parts: Wipe gently with a damp cloth and mild detergent, then dry immediately.

(2) Wooden parts: Avoid direct sunlight to prevent fading and cracking.

(3) Metal components: Store in a dry environment to prevent rust.

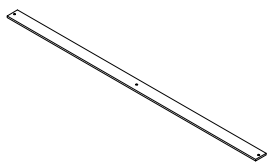

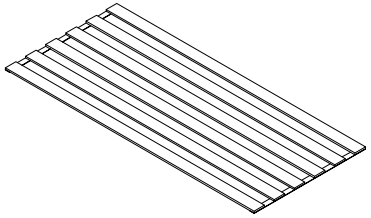

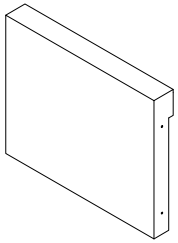

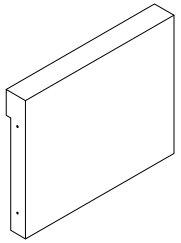

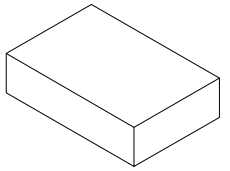

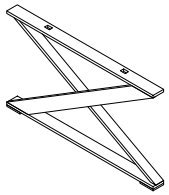

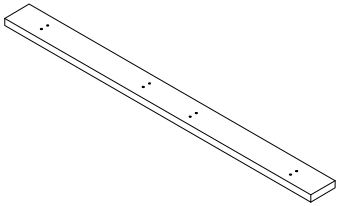

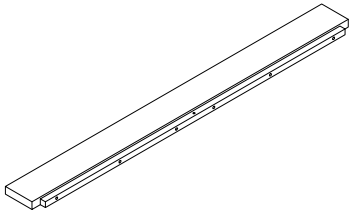

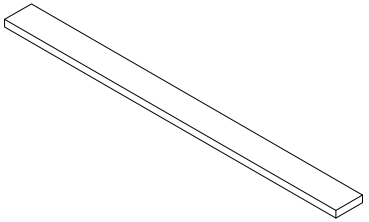

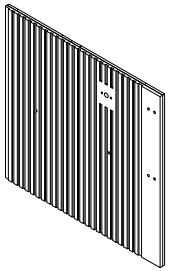

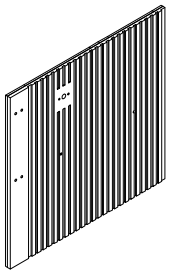

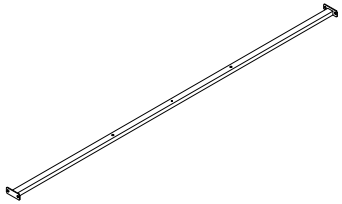

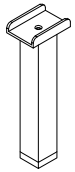

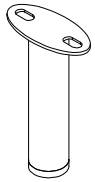

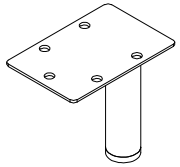

V. Usage Prohibitions

(1) Do not use a mattress of incorrect size, as this may cause uneven force distribution on the slats. (Suitable mattress size: 76× 80 inch)

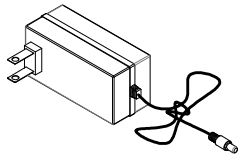

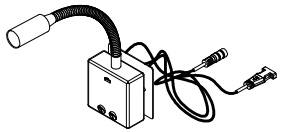

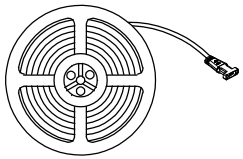

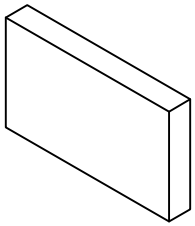

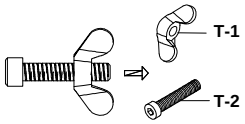

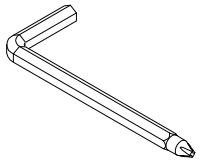

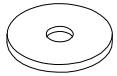

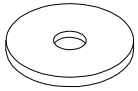

(2) Do not use the product in a damp environment for extended periods, as this may cause metal rusting and electrical malfunctions.

(3) Do not allow children to climb or play on the bed, as this may pose risks of falls and structural damage.
