

## Installation, use and precautions

The installation shall be carried out by a professional with an electrician operation certificate to avoid electric shock hazard. Please pay attention to the following matters

Please read the instructions carefully before installation and use, and keep them properly for later use

1. Please ensure that the lamps are securely mounted or placed smoothly
2. Please wear gloves when installing maintenance lamps
3. All electrical connections must comply with your local electrical safety regulations and must be installed and maintained by a professional
4. It is strictly prohibited to use the product in humid environment without special instructions
5. Replace the light source in strict accordance with the specifications and types of the product label instructions, otherwise it may damage the product and cause safety accidents
6. Electrical connection: The main power supply must have a power switch, and all wiring terminals must be firmly connected. Lamps with grounding terminals should be reliably connected. Professionals should select the appropriate current limiting switch for you according to nameplate lamp caps and this manual
7. Replace the light source: turn off the power switch, remove the old light source, and install the new light source with the same model into the lamp holder
8. Clean: turn off the power switch, do not use corrosive liquid to clean any part of the lamp, do not allow water into the lamp head or the inside of the lamp body, wipe the lamp body with a clean soft cloth.
