# How to Change your Freedom® Pet Flap

Many factors can cause flap wear, including seasonal weather changes, duration of use and your pet's routine. If there is damage to the flap, follow the instructions below to properly replace the pet door flap.

## Identify your replacement flap

The correct replacement flap can be identified by the number of screwes located at the top of the flap.

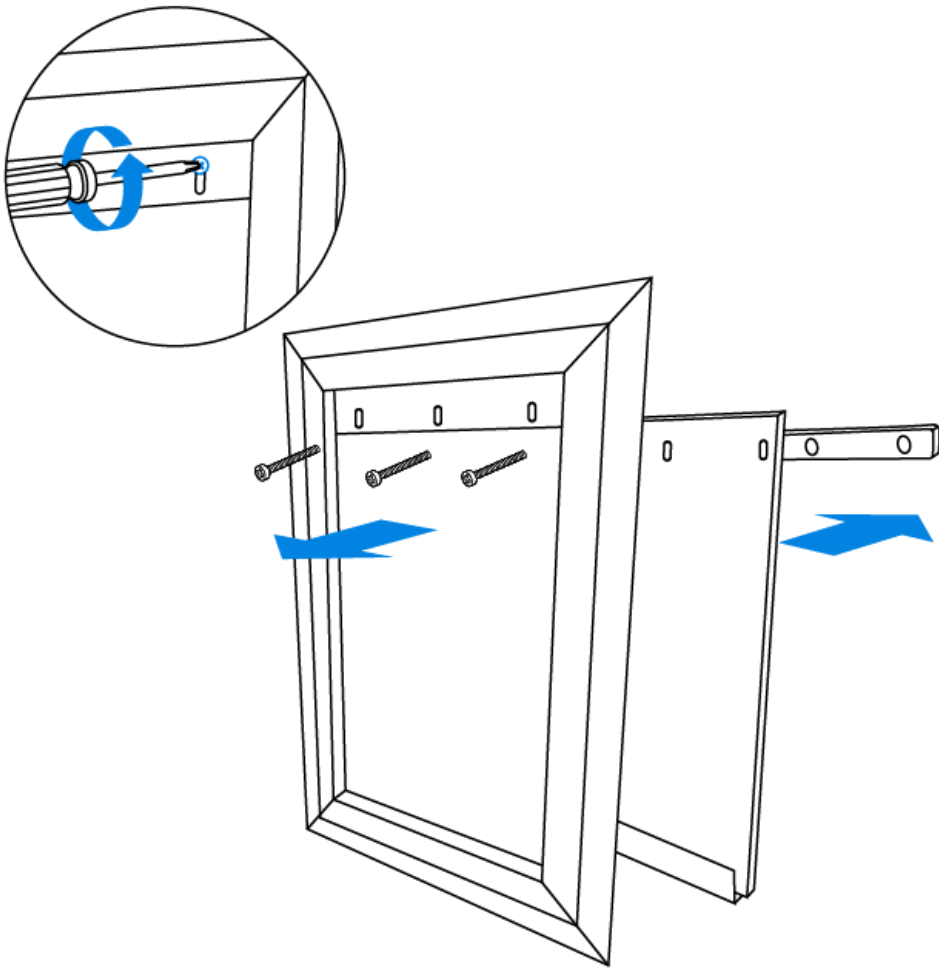

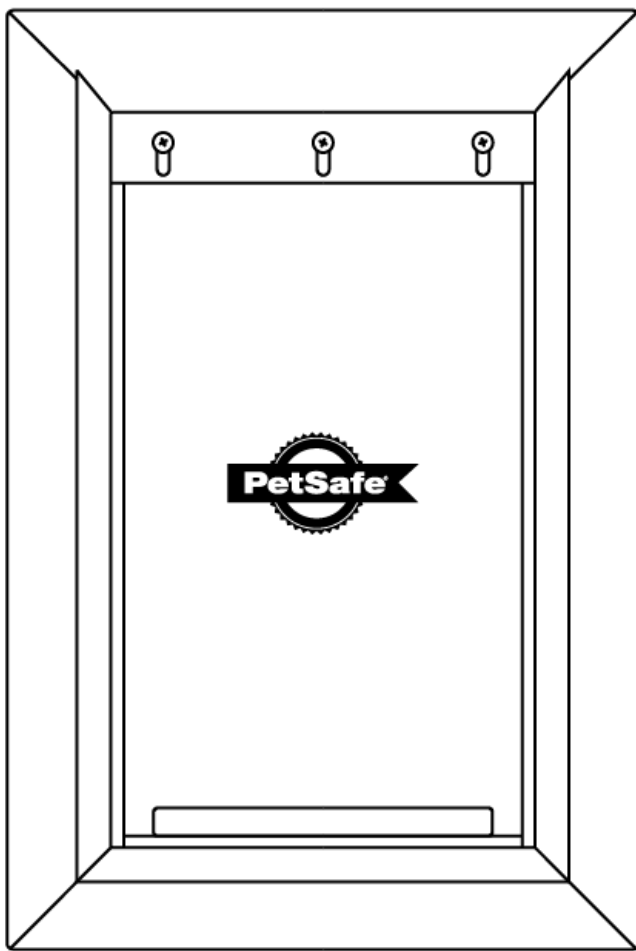

Small - three

Medium - four

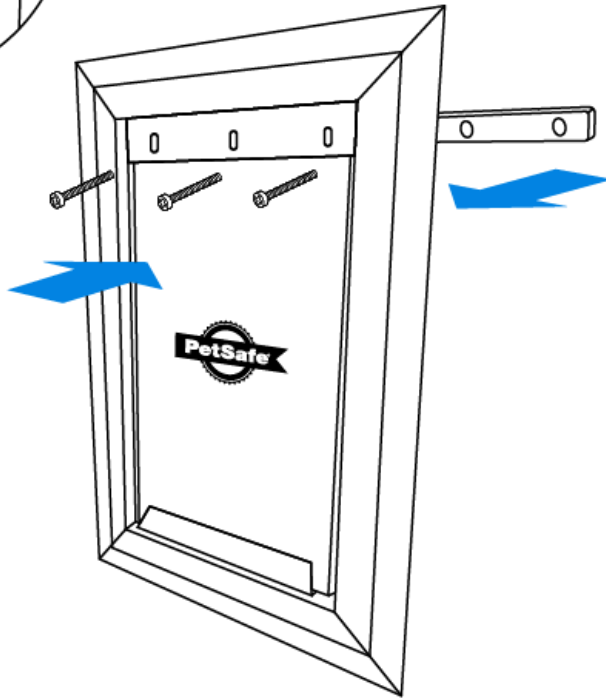

Large - five

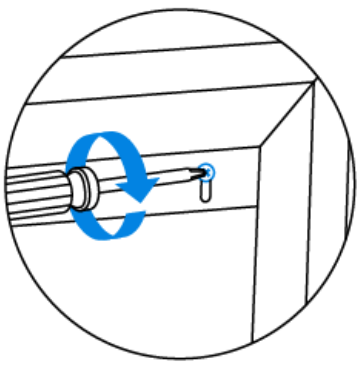

Extra large - six

**Replace flap:**

**1** Twist the screws off the pet door frame and remove the current flap and back bar.

**2** Align the new flap behind the frame so the magnet on the bottom of the flap seals with the bottom of the frame.
Note: Make sure the flap is level to ensure proper closing.

**3** Hold the back bar in place to secure flap between the bar and the front frame. Twist the screws through the front of the frame to the back bar.

**Note: Two people can make this process quicker and easier.**
