Installation steps:

Step A Install Left Seat and Right Seat. (Package 1, 2 and Package 5) Easily find the accessories packed in the seats by opening the hook and loop fastener. We will assemble ①④⑥ to make the left armrest module and then assemble ②⑤⑥ to the right armrest module. Firstly put ④⑥ together, install the large screw for about 1/3 of the reserved hole on ①, align the rest of the large screw with the hole on ④, insert the washer inside, and fix it with the nut. After all screws are fixed, cover the cloth on the base, and install all supporting feet ⑩ with small tapping screws. The installation of left armrest is completed. Do the same to install the right armrest.

Step B Install the Middle Seat (Package 3 or 4) Install a large screw to the reserved hole on ⑥ to align it with the hole on ③, insert the washer inside, and fix it with the nut. After all screws are fixed, cover the cloth on the base, and install all supporting feet with small tapping screws. The installation of middle is completed.

Step C (Package 5 or 6) Cover the cloth on the base, and install all supporting feet with small tapping screws. The installation of ottoman is completed.

Step D Install the buckles to fix the seats together. According to the reserved hole position, fix the buckles with the tapping screws on the bottom of the seats.

Step E The installation of the whole sofa is completed. You can build the position and shape according to the sets you bought.
