

DESIGNART

CANVAS COLLECTION

Thanks!

For making DesignArt part of your new home decor.

Here's how to hang and care for your new canvas wall art.

HANGING INSTRUCTIONS

Follow these steps to hang your canvas wall art.

1. Using a screwdriver, mount the brackets onto the back of the wood frame. For multi-panel artwork insert one bracket per panel, teeth side down. For single-panel canvas insert 2 brackets.
2. Using a flat-head hammer, insert the panel pin with rubber attachment in the desired space on the wall. Tap the panel pin until it is securely in the wall.
3. Using a measuring tape, measure the distance from your first panel pin to the desired placement of the second. Mark the wall and insert the second pin. Repeat per number of panels for even spacing.

CANVAS CARE GUIDE

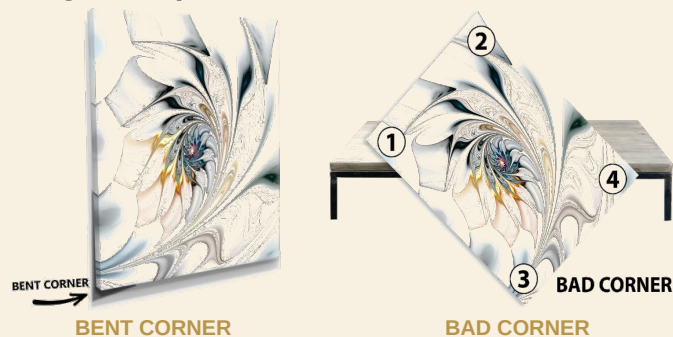

How to fix common issues with your canvas.

Fixing Creases

Rub a piece of ice directly onto the crease on the back of the canvas for 30–60 seconds. Let it dry for 15–20 minutes; the crease should disappear. Avoid oversaturating, or the canvas may need extra drying time.

Fixing a Warped Frame

Place the art along a table's edge. Place hands on the corner that was coming away from the wall and its opposite corner. Gently push down on the corners to stretch the canvas diagonal. Hang and test; repeat if needed.

Warranty & Disclaimer: While DesignArt Inc inspects every piece prior to packaging and uses the highest-grade materials, household temperatures, humidity, and other factors may affect the hold over time. DesignArt Inc will replace any defective item; use of this artwork is at your sole risk and DesignArt Inc disclaims all warranties regarding property damage, bodily injury, or other damages.

FRAMED WALL ART

Hanging instructions for framed canvas.

1. Using a screwdriver, mount the brackets onto the back of the wooden frame. For multi-panel artwork, insert one bracket per panel; for single-panel canvas, 2 brackets depending on size.
2. Using a measuring tape, measure the distance from your first bracket to the desired placement of the second. Mark the wall and insert the second hook. Repeat for even spacing.
