

Packaging list: 1 seat 2 pedals 1 installation base Various assembly screws, washers and nuts Installation tools

Installation Instructions

Step 1: Align the seat hole position and install it on the rear seat frame.

Step 2: Insert two washers and tighten four screws in sequence.

Step 3: Use the installation tool to recheck and tighten the nuts to fix the seat.

Step 4: Go to the sides of the seat, align the empty positions on the seat and install the footrests, then fasten the screws and tighten the nuts.
