Application

It is suitable for leafy vegetables to grow in the garden or even in an office, balcony, or rooftop. You can grow strawberries, lettuce, chilies, mint, peppers, rapeseed, celery, beetroot, pepper, garlic seedlings, and more.

Notes

1. Please note that if you plant vegetables indoors, you need to add LED growth lights (not included) to replace sunlight.
2. Please allow the slight color difference caused by the shooting light and 1-3 cm error due to manual measurement, and make sure you do not mind before ordering.
