

THE 5000 SERIES POKETO MATTRESS IS ALSO AVAILABLE IN THE FOLLOWING OPTIONS:

## WHAT'S IN OUR 5000 POCKET SPRUNG MATTRESSES

## 5000 SERIES

POKETO COLLECTION | SPRUNG

The 5000 series is the ultimate in comfort and durability with highly advanced, multi-layered spring technology and a comprehensive combination of luxurious natural materials and performance features. This top-of-the-range design includes 3,000 dual-suspension pocket springs for increased comfort and airflow, complemented by two layers of 1,000 tablet springs each containing over 1,000 mini pockets. Lambswool, silk, memory wool and cashmere are harnessed with contemporary design to provide a softer feel without compromising the strength of the support. Four rows of hand side stitching are attached to the springs to provide unbeatable shape retention.

- 5000 POCKET SPRINGS**  
Our dual-suspension 3,000 pocket springs represent the best spring technology on the market with an unrivalled combination of comfort and airflow efficiency. They are supplemented with two additional layers of 1,000 tablet springs each containing over 1,000 mini pockets.
- NATURAL LAMBS WOOL**  
Sourced from Yorkshire farms, our pure lambswool offers a wide range of qualities with a fine yet springy and resilient fibre structure which provides soft yet strong support. It contains pockets of air to maintain breathable performance to help regulate bed temperature.
- NATURAL SILK**  
Silk's continuous yarns make it one of the strongest natural fibres available. Sourced from UK suppliers, our silk adds a luxurious touch to this Poketo mattress. It is lightweight, breathable, hypoallergenic, highly lustrous and highly resistant to mould and mildew.
- POLY FILL REBOUND COTTON**  
Polyfill rebound cotton is a superior replacement for polyester fillings with better performance all-round. This natural filling is softer, more comfortable and more durable. This feature is incorporated into most Poketo mattresses, from the 3000 series up to the 5000 series.
- MEMORY WOOL & CASHMERE**  
Our memory wool, a 100% natural fibre, is an environmental alternative to memory foam providing a gentle feel and natural temperature regulation. Cashmere is a natural fibre, from the soft undercoat of a range of goat breeds. Cashmere's extremely fine fibres create superior softness, warmth and lustrous quality.

5000 SERIES | POKETO COLLECTION

- ecology**
- 4 ROW HAND SIDE STITCH**  
Side stitching is a common feature on mattresses but with inferior products it is applied merely for aesthetic effect. That's not the case with Poketo's hand side stitching - it is attached to the springs to fulfil its primary purpose of improved shape retention and durability.
- HAND TUFTED**  
To complement the advanced technology we apply the more traditional method of hand tufting in which tufts are driven through the mattress at regular intervals and secured at each end, creating pockets of fillings. This secures the mattress fillings to improve support.
- DUST MITE RESISTANT**  
The allergic effects of dust mites can vary from mild nasal problems to severe congestion or asthma attacks. Poketo mattresses are designed to be allergen-proof with materials that are carefully chosen to resist dust mites and prevent conditions in which they thrive.
- HAND CRAFTED**  
In addition to the same classic aesthetics and attention to detail applied to all Poketo mattresses, the 5000 series enjoys extra touches of hand-crafted detailing, including engraved branding. Our highly trained experts take great pride in their standards.
- BACK SUPPORT**  
Lack of spinal support can cause the vertebrae to squeeze the discs in the back, potentially leading to severe back problems. Poketo mattresses are designed to relieve key pressure points, including the lower back, and provide healthy spinal support to prevent aches and pains.
