Codes of the Mystics 2

D65S1297-435

Codes of the Mystics II is an expressive and emotive work in keeping with the Lyrical Abstraction Movement of the mid-20th century. The Movement is characterized by free-flowing lines, shapes, and colors that imbue this work with a sense of fluidity and movement. The work functions as both an abstract form and is suggestive of written expression. An understated color scheme in hues of dove grey, sand, mustard, and cerulean complements the work's poetic nature.

An air of mystery is created through ethereal forms and perceived scrawlings in this original piece for the exclusive ART by TA Collection.
