

## **How to Install**

1. Remove wall dust with a towel(not included).
2. Confirm the installation position and mark it with a marker pen(not included).
3. Remove the fixed chassis of the product.
4. Mark the punching position with a marker pen(not included).
5. Drill holes in the perforated position with an electric drill(not included).
6. Tap in the expanded screws and use a knife(not included) to trim off the protruding silicone head.
7. Align the holes and tighten the screws that secure the chassis.
8. Match the base with the fixed base and tighten the screws to fix the product.
9. Installation is complete.
