

Front side of the foot:  
large hole facing outward

Back side of the foot:  
small hole facing inward

Shoe board front side: stripes facing up

Back of the shoe board

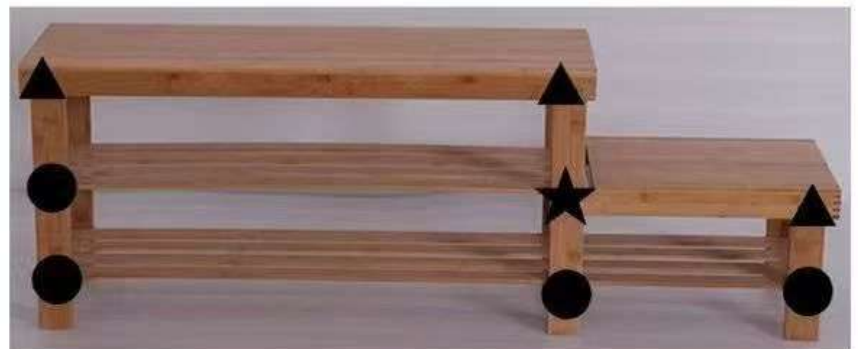

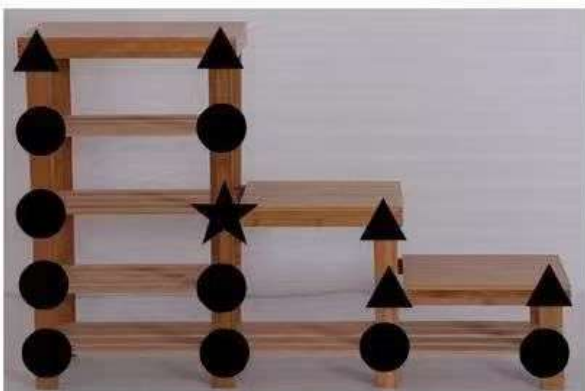

Tool usage method:  
Hold the tool with  
the long head

Panel installation method:  
Fixing with flat head screws  
and screw caps

Installation method for  
shoe plate: Fix with  
pointed screws

Note: 1. Some specifications of the seat panel are designed with one end longer than the other, and the footrest board is also designed similarly—not evenly divided. Installing them in the wrong orientation may cause misalignment of the screw holes. Before installation, please check the hole positions of the seat panel and footrest board first, and proceed with installation only when they align properly.

2. New products may have a slight odor initially. If you are particularly sensitive to smells, it is recommended to leave the product under sunlight for an afternoon before use.
