

SmartHome WiFi Light Switch

.....
Convenient device that allows you to turn on
and off your light from your smartphone

Compatible with Alexa and Google Assistant

Overview:

Aluratek's SmartHome WiFi Light Switch is the perfect device to enjoy the freedom of controlling your light switches. Control when to turn on and off your lights directly from your smartphone. Enjoy the convenience turning on your lights from virtually anywhere in the world. Want to turn on the entry way light of your house before you get home? Just open up the smartphone app, and turn on the light before arriving home. You can program as many devices as you want and group them together within the application to power on all at once. Compatible with Amazon Alexa or Google Assistant to power on or off any light of your choosing with just the sound of your voice.

Features:

- Cut out the cords because no wires are required or no Ethernet cables to set up this device
- Control your light switch through your phone, anywhere, anytime even when you're not home
- Compatible with some of your favorite devices including Amazon Echo and Google Home
- 1 year warranty
