# STEP 1

| HARDWARE LIST                                                                                                            |                                                                                                                   |                                                                                   |
|--------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|
| Three-in-one connecting rod<br>B  45PCS | Small adjustable foot<br>E  4PCS |  |

1.Put the three-in-one connecting rod in the 10mm hole of the following panels and tighten them with a cross screwdriver or an electric tool.

2.Fix the small adjustable feet on the bottom of the left and right side panels

# STEP 2

1.Strike the 08\*40mm wood dowel pin into the 8m hole of the above panels with an iron hammer. Please note that the hole of the three-in-one connecting rod should also be 8mm. The hole of the three-in-one connecting rod connects to the hole of 15mm three-in-one eccentric wheel.

| HARDWARE LIST                                                                                                           |                                                                                       |
|-------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
| 8*40mm wood dowel pins<br>D  33PCS |  |

## STEP 3

1. Connect No. 3 panel to No. 9-10 panel tightly with the three-in-one eccentric wheel.

2. Cover the mounting hole of the eccentric wheel with a three-in-one sticker.

### HARDWARE LIST

| Door panel anti-jump plate                                                                 | 4*16mm screw                                                                                 |  |
| L  1PCS | H  2PCS |                                                                                       |

## STEP 11

1. Use 6\*30 screws to fix the door panel pulley on the 13 plates

2. Use 4\*23 screws to fix the door handle on the 13 plates

| HARDWARE LIST |              |                   |              |  |
|---------------|--------------|-------------------|--------------|--|
| Door handle   | 4*23mm screw | Door panel pulley | 6*30mm screw |  |
| F  1 PCS      | G  2PCS      | K  2PCS           | J  4PCS      |  |

## STEP 12

Buckle the door panel onto the door panel track

**Choking hazard-Small Parts :** This unit contains small parts, not for children under 3 years.

**Tip-over hazard :** Secure finished unit to wall stud using L-Bracket and wall screw (#10\*1.5"W/out provided). If a wall stud is not neccessible , Consault your local hardware store for appropriate mounting hardware . Failure to properly install will result in product collapse or tip-over. Serious injury can occur .
