

INSTALLATION INSTRUCTIONS

360 Photo Booth

1. Open the package and take out all the accessories.
2. Put the 360 photo booth upright. Adjust the height of the cushions to keep the 360 photo booth stable.
3. Put the shaft into the balance board. And fix it with 2 M8 screws on the left and right sides respectively.

4. The bending pole (with the box opening facing up) is mounted on the shaft. First use M8 screws to fix the left and right center positions. Adjust the appropriate angle, and then fix the edges on both sides with M8 screws.
5. Install thicker pole + thinner pole or install thinner pole to the bending pole directly (thicker pole is not necessary)
 - 5.1 Insert the thicker pole into the bending pole. The left and right sides are fixed with 2 M6 screws respectively. Then insert the thinner pole into the thicker pole. The left and right sides are fixed with 2 M6 screws respectively. By adjusting the corresponding hole position, the height can be adjusted
 - 5.2 Insert the thinner pole directly into the bending pole. The left and right sides are fixed with 2 M6 screws respectively. By adjusting the corresponding hole position, the height can be adjusted.

6. Install the ring light on the head of the thinner pole. Tighten the head screws.
7. Plug the female connector into the DC connector of the power supply. Plug the power cord and the power supply.

INSTALLATION INSTRUCTIONS

360 Photo Booth

8. How to install mobile phone, camera, and iPad (choose one of three)

8.1 Mobile phone installation. Install the phone holder assembly on the central screw hole of the ring light, pull out the ends of the phone holder, and put the phone into the slot.

8.2 Camera installation. install the camera on the gimbal. Tighten the gimbal screws.

8.3 iPad installation. Install the iPad holder assembly on the thinner pole and tighten the fixing screws. Press the button on the side of the stand and pull out the buckle. Put the iPad into the slot, and then tighten the buckle.

9. Put the portable charger (5V USB, not provided in the package) in the bending pole box. Plug the USB port of the ring light into the portable charg

10. Insert the three plugs of the power cord into AC100-240V and the installation is complete!

NOTICE:

- 1.Reverse rotation,speed of the motor and the color of the ambient strip light can be adjusted through the remote controller.
2. All batteries are not come with photo booth, need to buy separately. Battery for remote controller(specification AAA 1.5V x2), battery for the ring light (specification 5V USB Portable Charger).
3. The medium pole can be removed if needed, then connect the large pole with the small pole directly.

AAA battery 1.5V x2

5V USB Portable Charger
