Step 43

As shown, When installing the drawer, pull the guide rail out first, Slide beads are also pulled out.

Step 44

If a large gap is found after installing the drawer the slide rail can be moved up and down to adjust the gap

Step 45

First, loosen the screws.

Note the orientation of the door hinge: the end with the screws faces toward the cabinet interior.

Step 46

First, loosen the screws.

7

x1

x1

1. Take out the white foam pad
2. Fit the pad around the edge of the glass panel
3. Then slide the metal clamp over the assembled position
4. Finally, tighten the screws securely

Locking screw

T

Step 47

First, loosen the screws.

A line drawing illustrating the first step of the process. On the left, a rectangular bracket with a vertical support leg is shown. Two screws are attached to the bracket. A screwdriver is positioned to the right, with its tip inserted into the head of one of the screws. Two curved arrows around the screw head indicate a counter-clockwise rotation, signifying that the screw is being loosened.

7

1. Take out the white foam pad
2. Fit the pad around the edge of the glass panel
3. Then slide the metal clamp over the assembled position
4. Finally, tighten the screws securely

Locking screw

Step 48

Pay attention to the direction of
the door hinge during installation

7

Fix the dressing table to the wall

User's Guide

Thank you for purchasing this product. To use this product, please plug it into a 12V DC power supply. Please use if the product works normally after connecting to power.

Introduction

The box is an intelligent controller with 2 touch buttons. It can turn ON/OFF the light, change light colors, and adjust the light luminance.

Product Show

ATTENTION PLEASE

- 1. If there is no touch response suddenly, Re-plug the power to reset the touch static electricity.
- 2. If bubbles appear on the panel, remove the protective film.

Operation

This touch button is used to turn on/off, change colors, and adjust brightness.

A. Short touch -> lighting on -> short touch -> change light color -> short touch -> change light color -> short touch -> lighting off. B. Long touch -> adjust the luminance

This touch button is used to turn on/off the induction function.

- A. Short touch to turn on the induction function. It can auto-turn on the light when people are close to the controller in 1 meters. It can auto power off the light when the body is far away from the controller after 30 seconds.
- B. Long touch to turn off the induction function.
- C. Note: When you touch the light button to change the light modes, the induction function will automatically turn off. It is best to turn on this function after selecting the light color and adjusting the brightness you want.
