

IRON WOODS®

HARDWOOD DECKING & SIDING

DECK TILE KIT SAMPLE LAYOUTS

Each kit contains (1x)IRON WOODS EPDM-80 1/4" Pedestal and (4x) PRESSURE PINS for each Iron Woods Deck Tile ordered.

The actual deck tile layout will determine the number of pedestals needed.

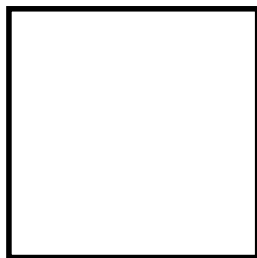

The IRON WOODS EPDM-80 PEDESTAL is designed to be cut into 1/2 and 1/4 sections as needed for corners and perimeter useage.

Below are several diagrams used to determine how many pedestals you will need for your layout. Additional Pedestals and Pressure Pins can be ordered separately.

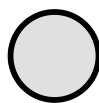

NOTE: Ironwoods Deck Tiles are made of a very strong and ridged wood species, hence the name IRON WOODS. Your tiles must be layed out "square" or you risk snapping pressure pins.
