

# Installation Instruction

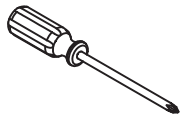

Please check all 21 types of panels and 18 types of hardware before assembly.

# Assembling

## What you need

- Use the packaging carton as a working surface to prevent product damage during assembly
- Phillips head screwdriver

## Weight Limitation

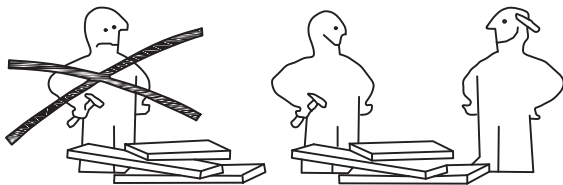

**100**

lbs table top

**| 35**

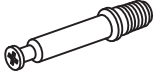

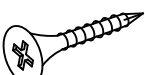

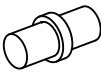

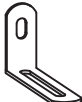

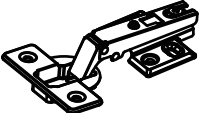

lbs per

# What' included

| Code | Description              | Qty |
|------|--------------------------|-----|
| A    | Cam Bolt M6X35MM         | 31  |
| B    | Cam Lock M15X9.5MM       | 31  |
| C    | Wooden Dowel M8X30MM     | 16  |
| E    | Screw M4X14MM            | 6   |
| F    | Screw M3X14MM            | 11  |
| G    | Screw M4X12MM            | 24  |
| H    | Screw M4X40MM            | 10  |
| I    | Shelf bracket            | 12  |
| J    | Screw M6X20MM            | 6   |
| K    | The back button          | 9   |
| L    | L-shape Metal connnector | 2   |
| M    | Anchor                   | 6   |
| N    | S-shaped iron hook       | 5   |
| O    | Magnetic latch           | 1   |
| P    | Wrench M4                | 1   |
| Q    | Hole position sticker    | 31  |
| R    | Hinge                    | 4   |

# The Hardwares

|                                                                                     |                                                                                     |                                                                                    |                                                                                     |                                                                                      |

|  |  |  |  |

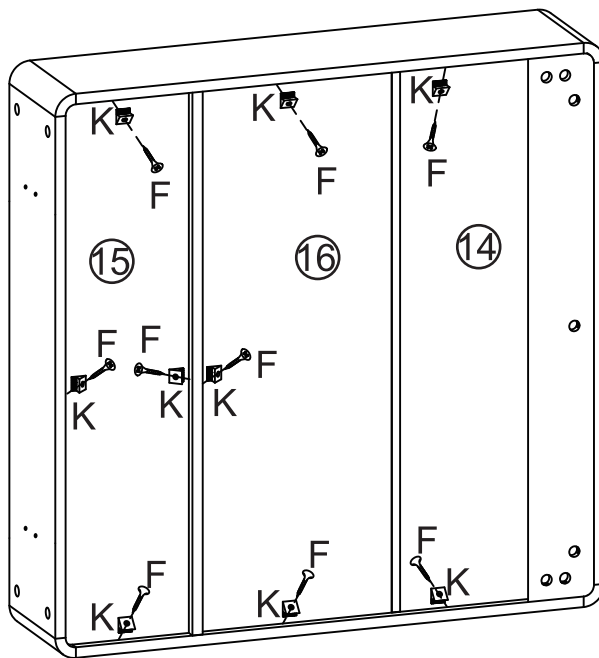

# Step 10

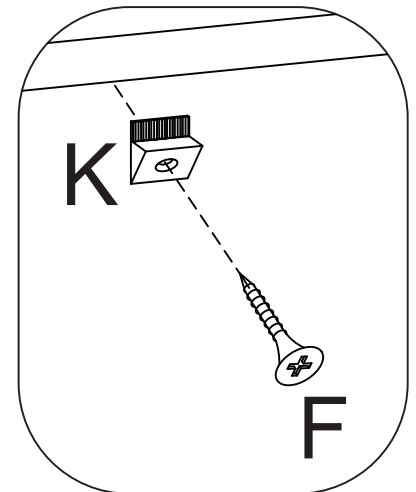

| B x 8                                                                                 | C x 3                                                                                 | Q x 8                                                                                 |
|---------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
|  |  |  |

# Step 11

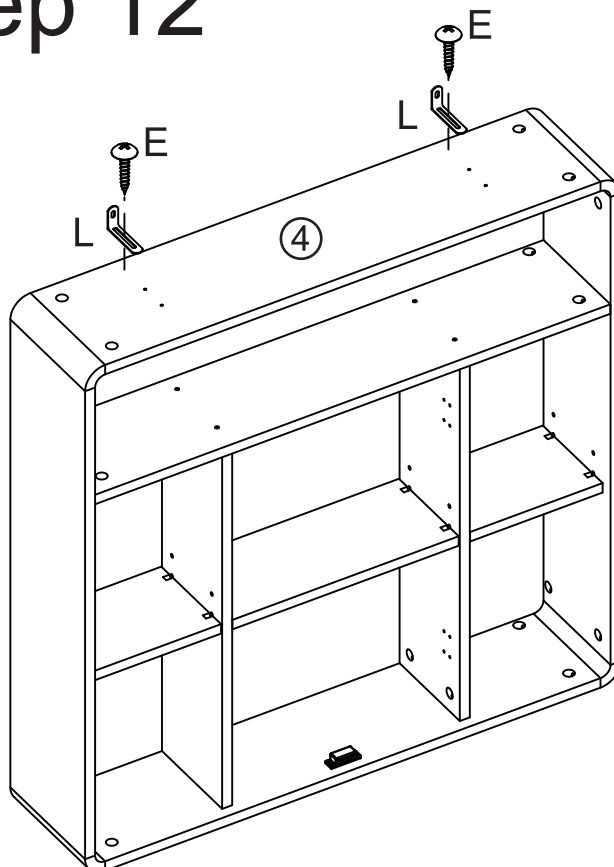

| F x 9                                                                               | K x 9                                                                               |
|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
|  |  |

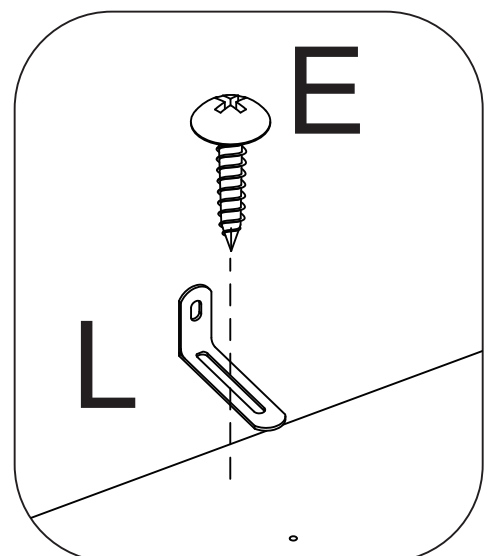

## IMPORTANT:

Do not skip installing any of the 9 back buttons (K).  
These are essential to prevent the cabinet from wobbling.

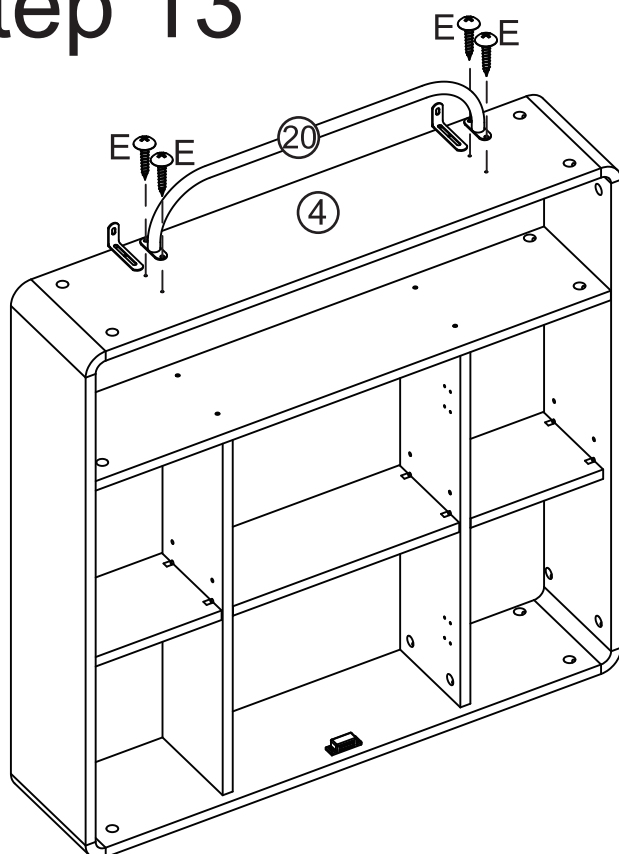

# Step 12

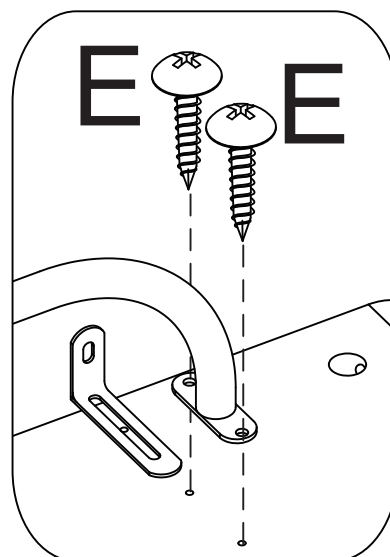

| E x 4                                                                                 |
|---------------------------------------------------------------------------------------|
|  |

# Step 13

E x 4

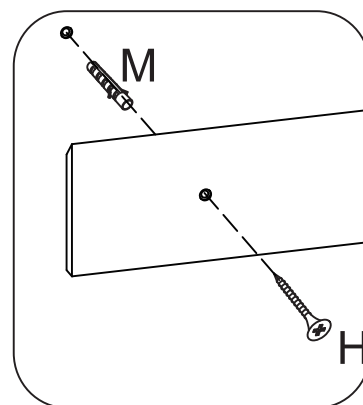

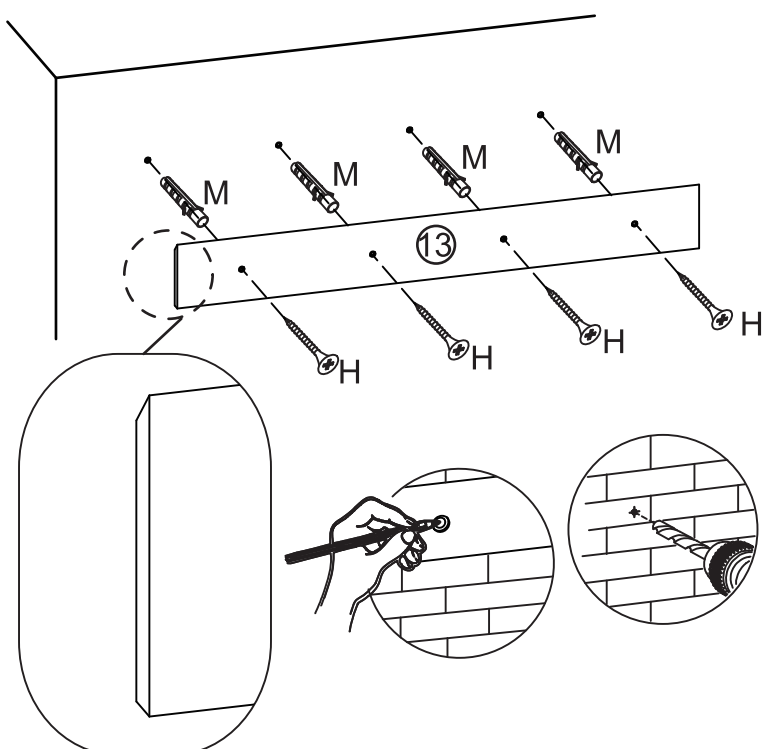

# Step 14

TIP: Use a level and mark the wall holes accurately. We recommend having another person hold the cabinet against the wall while you mark the drill points.

H x 4

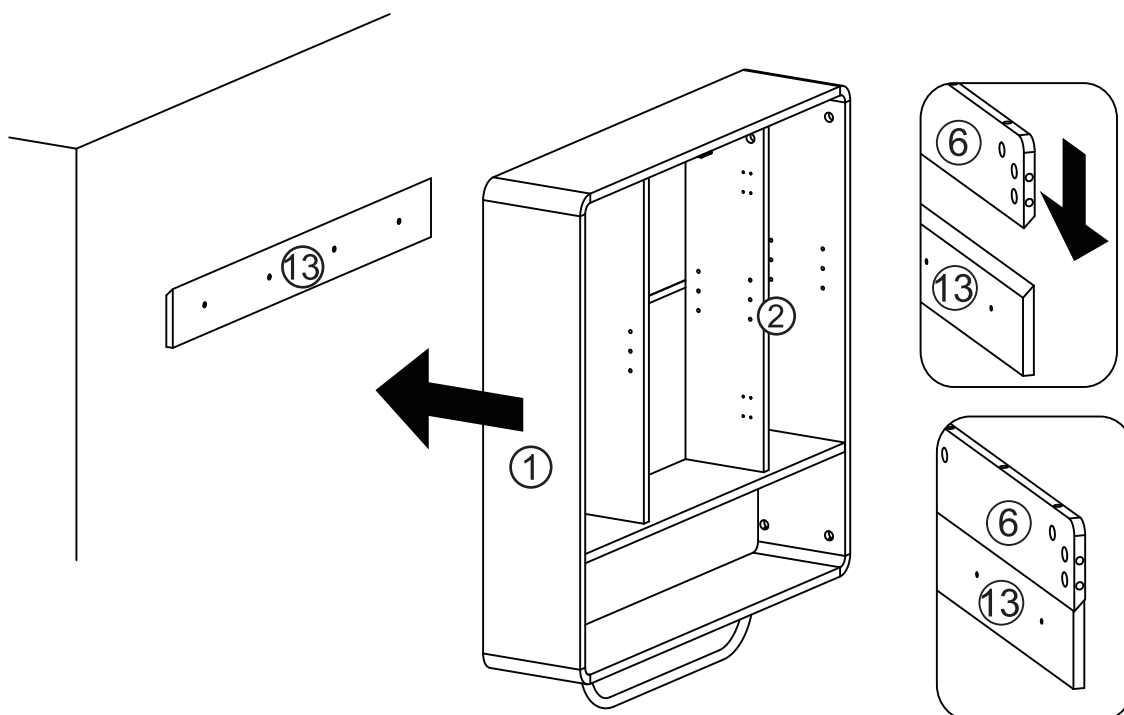

M x 4

The provided anchors (M) are for solid walls.

If installing on drywall, please use appropriate hollow-wall anchors (not included).

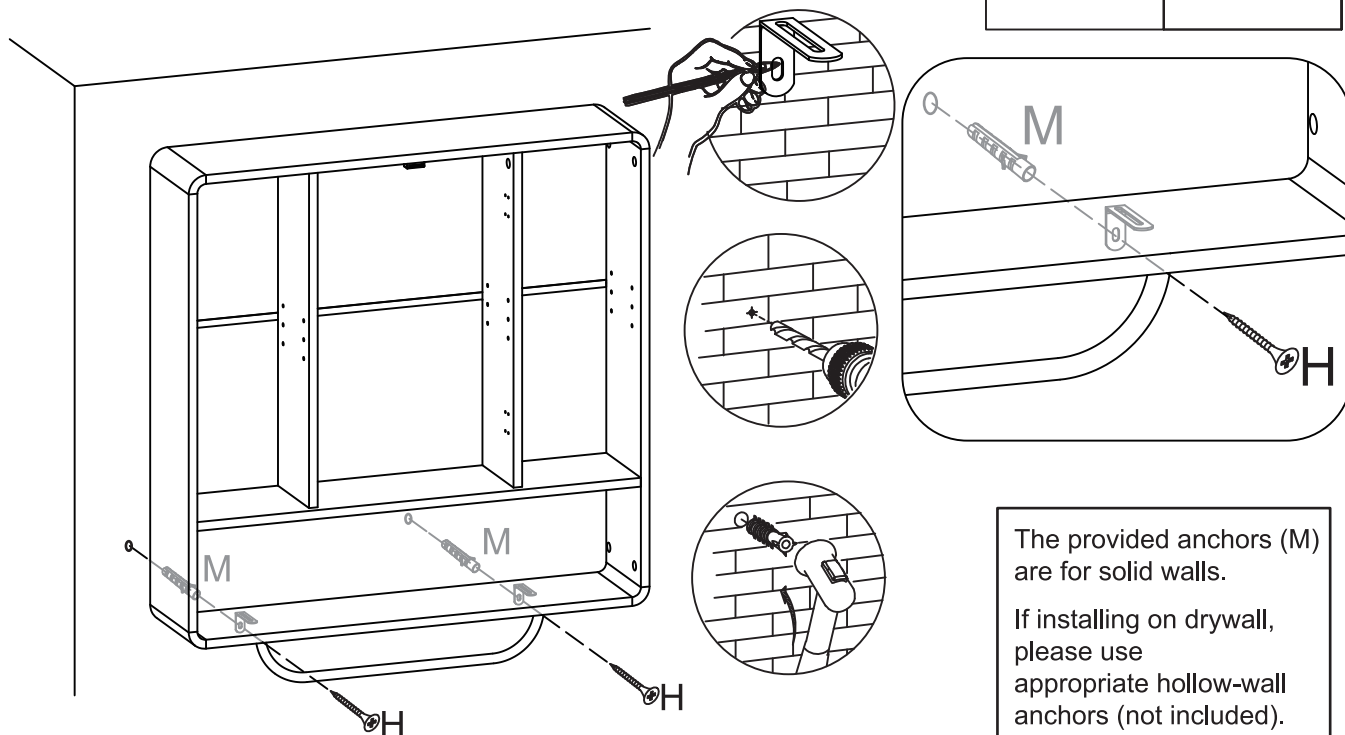

# Step 15

# Step 16

TIP: Use a level and mark the wall holes accurately. We recommend having another person hold the cabinet against the wall while you mark the drill points.

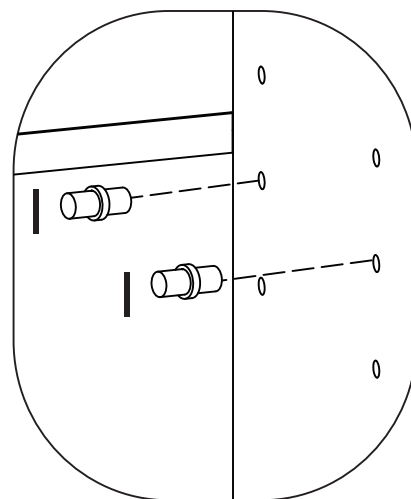

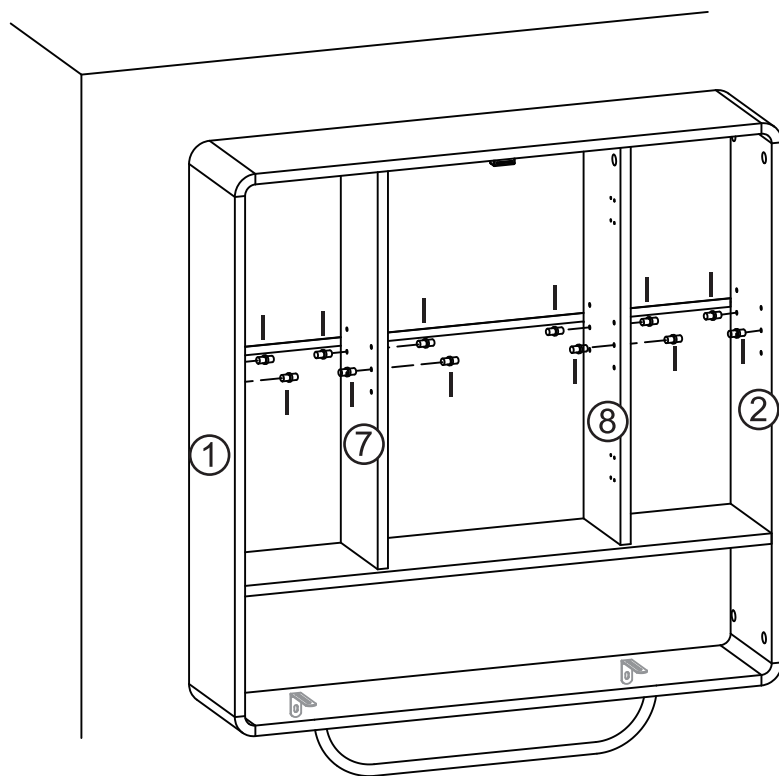

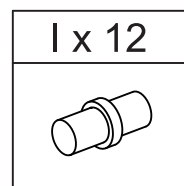

| H x 2 | M x 2 |
|-------|-------|
|       |       |

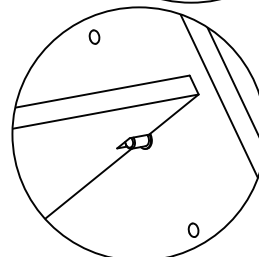

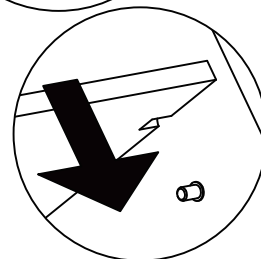

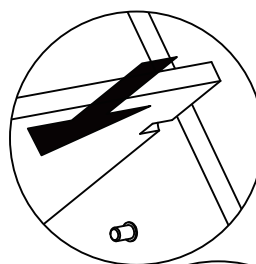

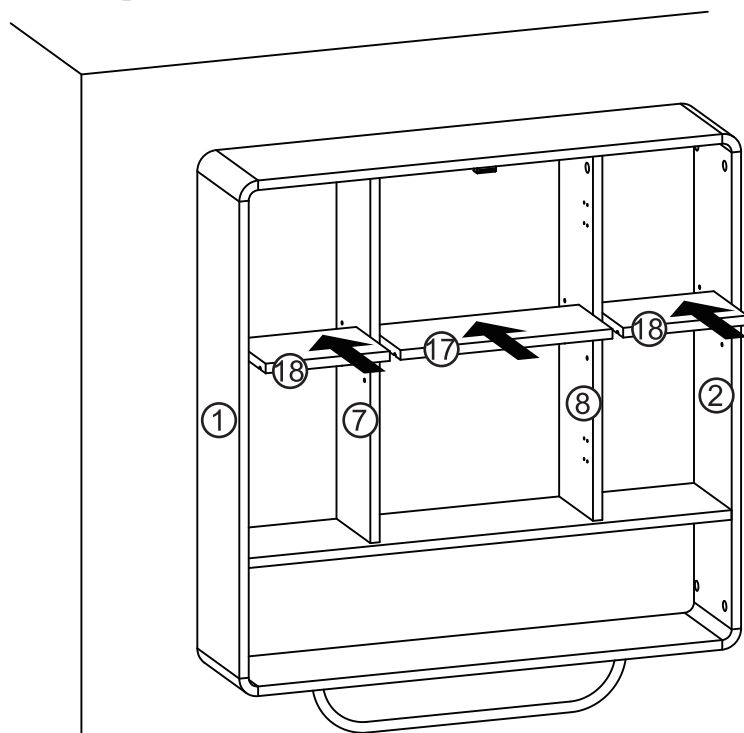

The provided anchors (M) are for solid walls.

If installing on drywall, please use appropriate hollow-wall anchors (not included).

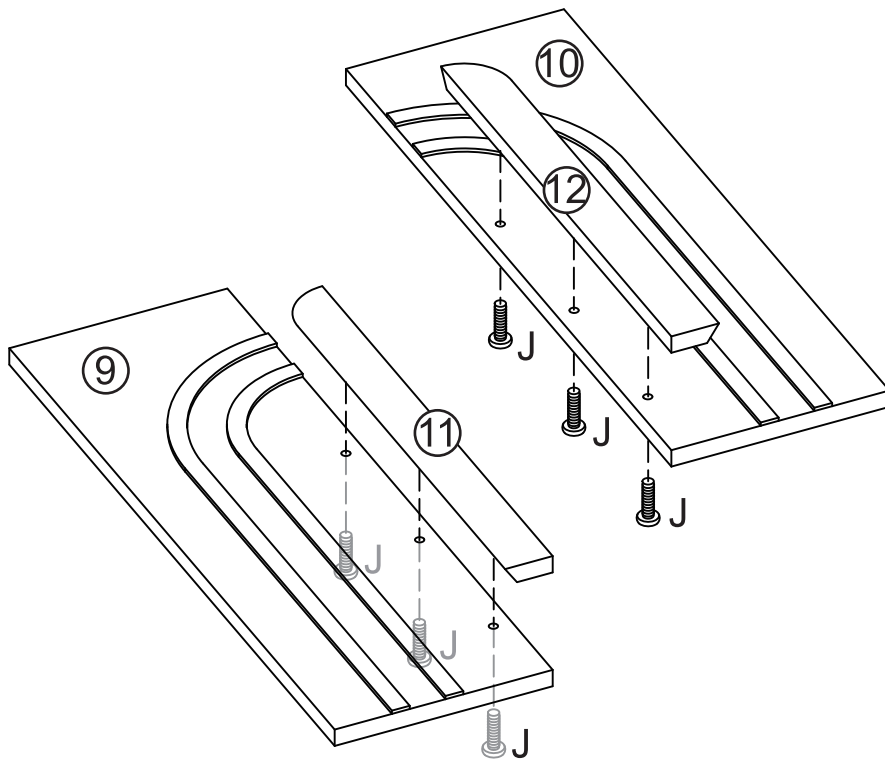

# Step 17

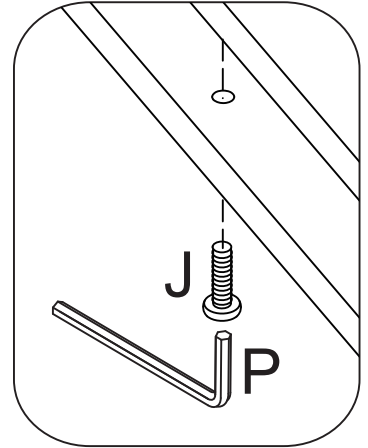

# Step 18

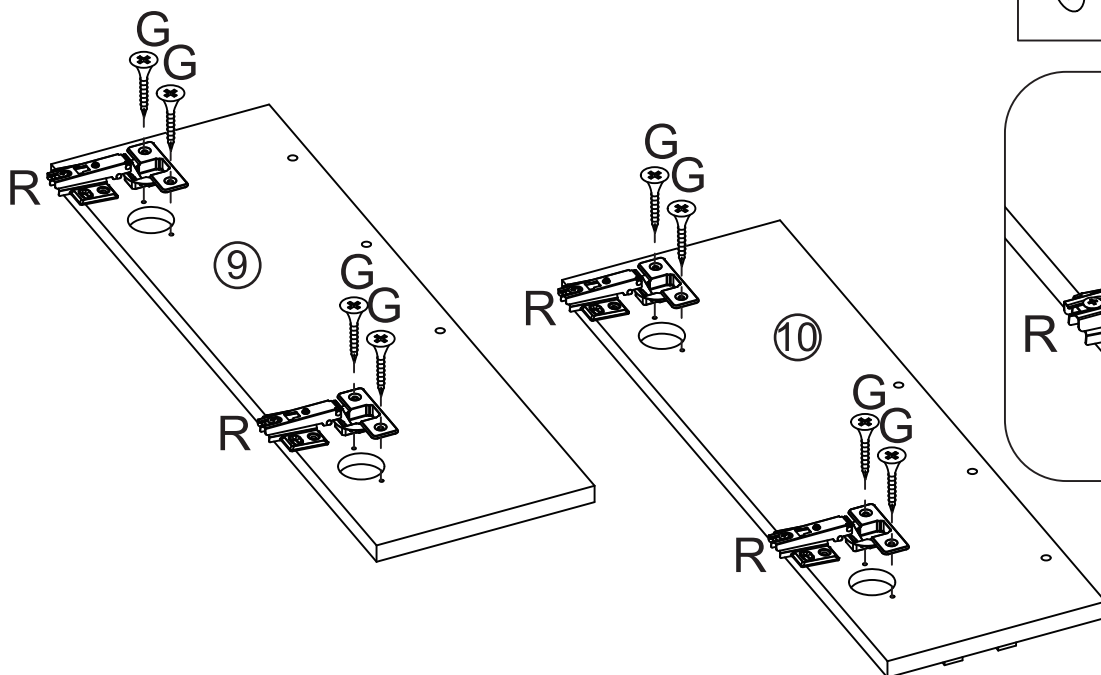

# Step 19

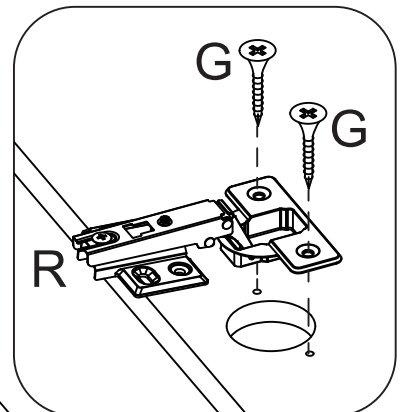

| J x 6                                                                               | P x 1                                                                               |
|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
|  |  |

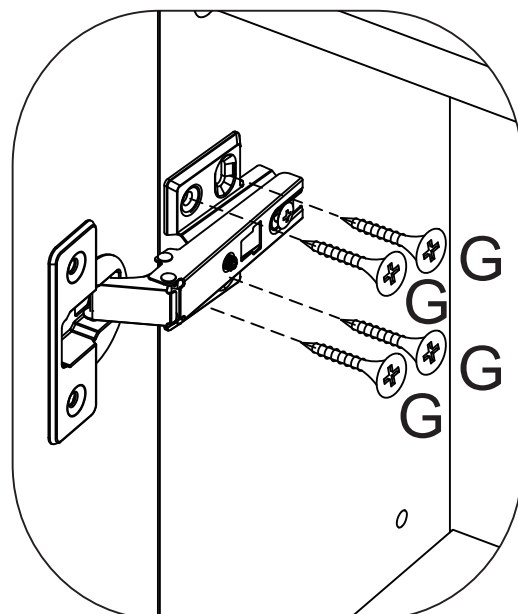

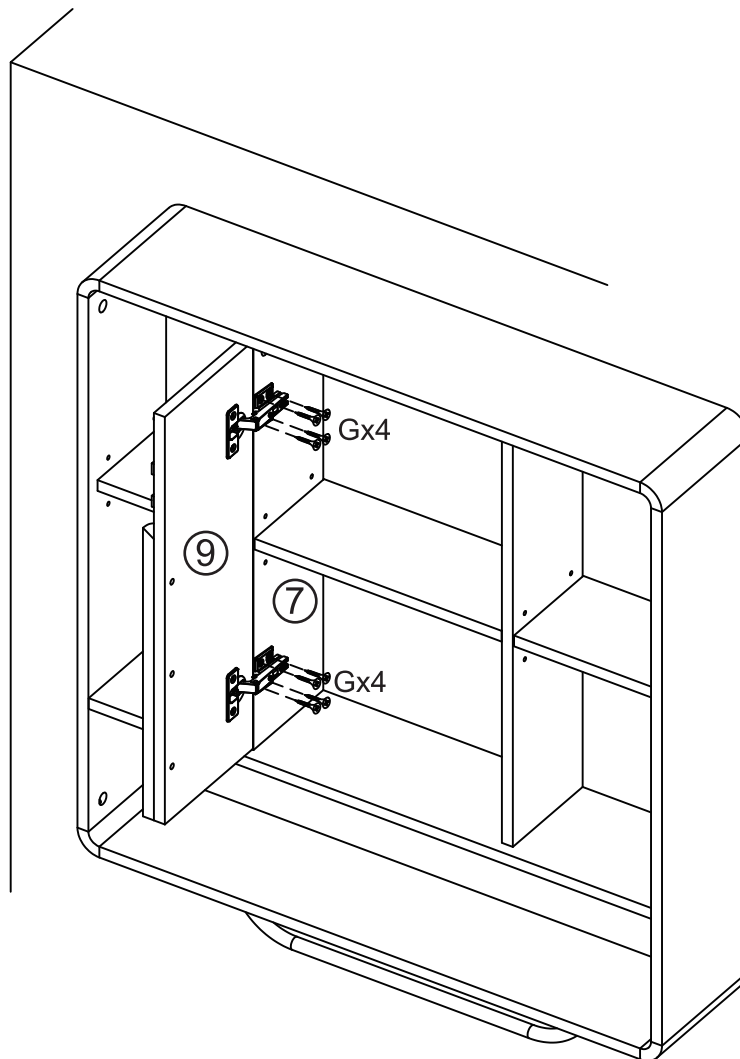

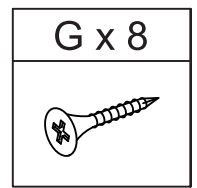

# Step 20

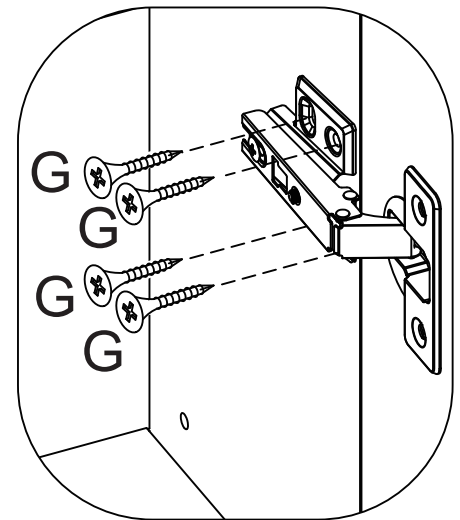

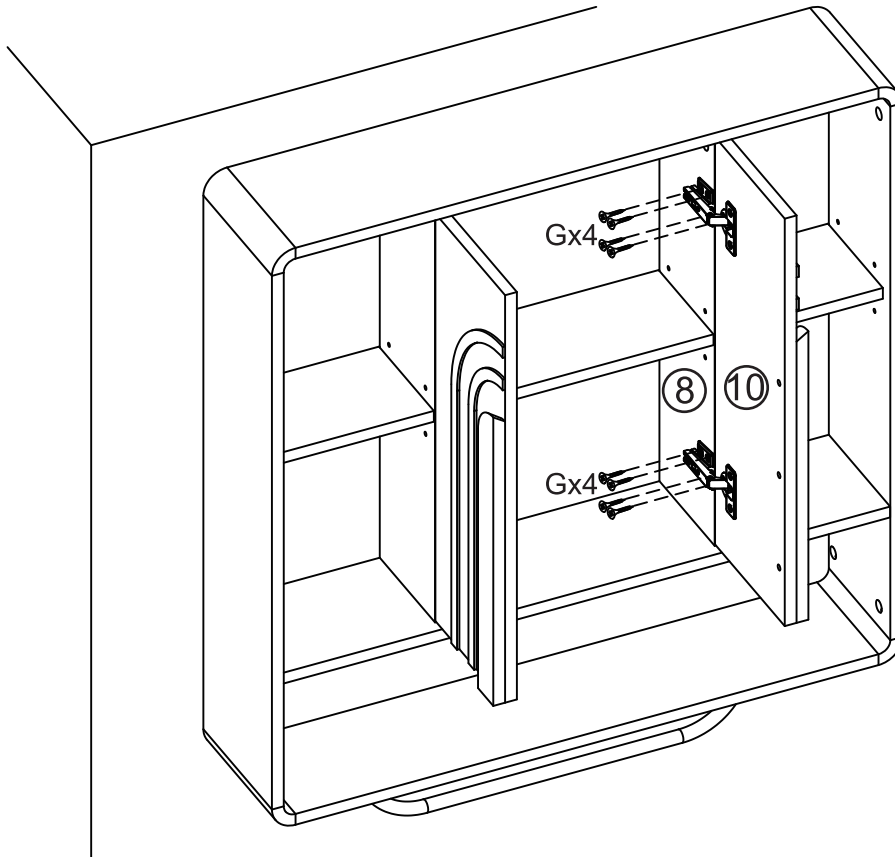

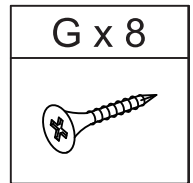

| G x 8                                                                                 | R x 4                                                                                 |
|---------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
|  |  |

# Step 21

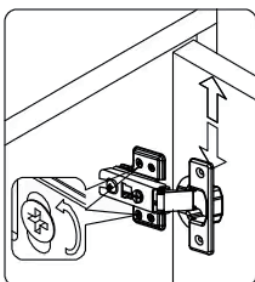

# Step 22

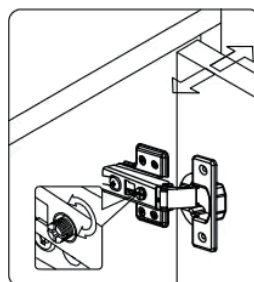

How do I get the two doors to align flat by adjusting the hinges?

Adjust up and down

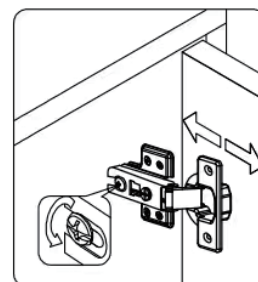

1. Height Adjustment:  
Adjust Screw 1 to  
shift the door up or  
down to align it with  
the frame.

Adjust left and right

2. Depth Adjustment:  
Loosen Screw 2 to  
move the door in or  
out so it sits flush with  
the cabinet.

Adjust before and after

3. Gap Adjustment  
(Side-to-Side):  
Turn Screw 3 to  
adjust the horizontal gap  
between the two doors.

Note: For the best results,  
please adjust both the top and bottom hinges of the same door simultaneously

# Step 23

Do not overload. To ensure long-term stability, we recommend a maximum load of 35 lbs per shelf.

N x 5
