✗ Unable to charge in the shadow

Do not install in a location without direct sunlight, if the photovoltaic panel cannot receive sunlight,the solar lamp will not work properly at night.

✓ Installed in direct sunlight

HOW TO INSTALL?

1. Cover the solar panel or place the light in a dark environment, turn on the switch to check if the light work normally.

2. As shown in the figure, justify groove part to fix the connector.

3. Thread the bracket through the mounting base.

4. Fix the bracket and base together with nuts.

5. Use long screws to fix the base at the position you need to install, unplug the blue cover, and connect the light head with the bracket.

6. Fix the light head and the bracket firmly with screws.

3 LIGHTING MODES

Select mode by pressing the white button.

x1 - Mode1 (30%) :

Press white button to turn on the switch, and the first mode is auto dusk to dawn, the light will keep dim light all night, regardless of whether motion is detected by the sensing range of the light.

x2 - Mode2 (30%—60%—30%) :

When motion is detected nearby, the light will display 60% brightness, if no motion is detected within 20s, it will display 30% brightness.

x3 - Mode3 (OFF—100%—OFF) :

At night the lamp will remain OFF until the sensor detects nearby movement then turn to 100% brightness, light will turn OFF after no motion is detected within 20 seconds.

NOTE: When using it for the first time, if the wall lantern does not light up, please place the wall lantern in direct sunlight to charge it for 8 hours.

FREQUENTLY ASKED QUESTIONS

Why does my light not come on at night?

- (1) Make sure the switch is ON (White button). Light can only be charged when the switch is turned on.
- (2) Make sure that the location you install does not have shade or eaves to block the sun.
- (3) Make sure that there are no other light sources above the solar panel at night, such as street lights.

Does the solar panel require the direct sun to charge?

The solar panel must be installed in a location where it can receive full direct sunshine (when available) and usually set the solar panel facing South at an appropriate angle. The solar panel must not be installed in a shaded or part-shaded location.

What type of battery does my solar hanging light require to operate?

The solar barn light requires one Lithium-ion 3.7V 1500 mAh battery, battery model: 18650.

Can I use any regular bulb for the solar barn light?

Only bulbs purchased through Aulanto can be used for this product.

IF THE LIGHT DOES NOT TURN ON AT DUSK AFTER 6-8 HOURS OF CHARGING:

- 1: Unscrew the three fixing screws as shown in the picture.
- 2: Uncover the lampshade gently upward.
- 3: Check whether the internal circuit is off, loose, etc.
