20in.(W)x 36in.(H)x5.3in.(D)	16.9in.(W)x 33.4in.(H)x4.1in.(D)

02/Installation Steps

IMPORTANT

- 1.This product contains glass parts.Care must be taken when fitting or handling these parts to prevent personal injury or damage to the Products; if the glass is broken, please stop using it and replace it from agent or manufacturer.
- 2.Care must be taken before drilling fixing holes to avoid any existing wiring or pipework that may be concealed; Finish the installation as following steps.
- 3.When installing the product, please have it operated by a professional electrician, and ensure that the voltage is between 110V and 120V. If the voltage exceeds 120V, a transformer must be used. For any questions, please consult an electrician.

MAINTENANCE CLEANING

Cabinet(s) should only be cleaned with clean chamois leather moistened with warm water and given a final polishing buff with a soft,lint free cloth.

03/Recessed Installation

Step 1.Carefully remove all packing material. Place shelves and hardware aside until needed.

Step 2.Determine desired location of cabinet on wall.Mark wall to show wall opening size. Generally, the recommended height to the center of the cabinet is 64" from the floor.

Step 3.CAUTION: Wall studs, plumbing or electrical lines that interfere must be removed or relocated. Cut wall opening, being careful not to damage the surrounding wall surface. Insert framing to support all plaster board edges.

03/Recessed Installation

Step 4. Insert cabinet into wall opening in plumb and centered position. Use a carpenter's level and shim corners of cabinet if necessary. Place the level on the object you want to measure, ensuring good contact between the level and the object. Then observe the position of the bubble. If the bubble is in the middle, it indicates that the object is level.

Step 5. Once cabinet is inserted into wall, measure down 4.3" from the top and the bottom of the cabinet. Center the measurement on the sides of the cabinet.

Step 6. Using a drill bit, drill a total of 4 pilot holes in the locations determined in Step 5. Secure to wall studs through the 4 mounting holes inside cabinet (screws provided)

04/Surface Installation

Step 1. Open the door and measure four (4) mounting holes

04/Surface Installation

1

2

Step 2. Mark four (4) mounting holes on the wall corresponding to the pre-drilled hole locations in the mounting bars on the inside back panel of the cabinet.

Step 3. With the assistance of a helper to hold the cabinet in place, drive the provided mounting screws to securely fasten the cabinet to the mounting surface.
