

Care

Place your doormat where you will most impress house visitors and high foot traffic areas to reduce dirt and dust being walked into your home.

Cleaning and caring for your doormat:

1. Take your doormat outside somewhere you don't mind getting dirty like a lawn.
2. Shake the doormat to loosen and get rid of excess debris
3. Beat the doormat with a broom handle or similar implement in order to expel dirt and stones more embedded in the bristles. Ideally, do this over a rail or washing line.
4. With a stiff wetted hand brush scrub areas covered in dirt to remove.
5. Position back in place and give the mat a final Hoover to extract the rest of the dust and dirt. Use the brush setting should your Hoover have one.
6. It is a good idea to shake out your doormat every week or so.

Uses

Suitable as outdoor doormats to remove mud and dirt before entering your home
