

This is the installation video and accessories of the entire fish tank

Here are two lamps

This is the filter material.

Here are two lamps. This is the filter material

This is from Sheung Shui.

This pipe is sewer.

This is from Sheung Shui. This pipe is sewer.

This is the drain switch.

This is a water pump.

This is the drain switch. This is a water pump.

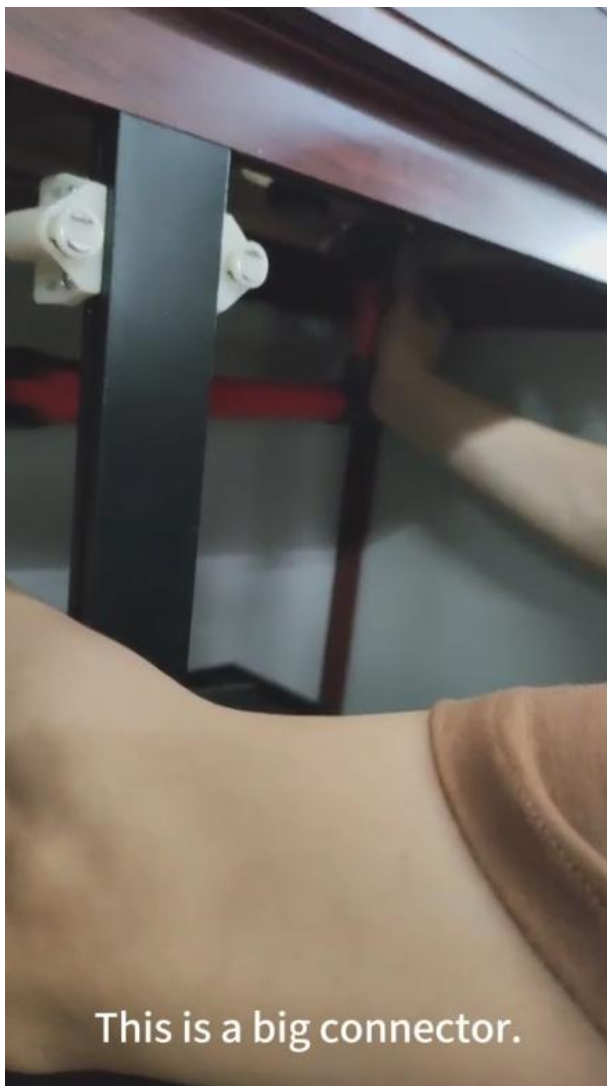

Our first step is to install the sewer pipe

It has two joints under that fish tank.

Our first step is to install the sewer pipe

It has two joints under that fish tank.

This is a big connector.

The drain switch is still in this position.

This is a big connector.

The drain switch is still in this position.

Then just tighten it.

It has a large and a small water switch.

Put two packs in one grid.

Put filter cotton on it.

Put two packs in one grid. Put filter cotton on it.

Just lay it flat.

Just lay it flat.

Our connector can be placed separately at that time.

Just put it inside and tighten it.

Our connector can be placed separately at that time.

Just put it inside and tighten it .

Yes, we'll match this hose a little longer. Then you put it on directly

The hose can be cut shorter then. It looks like this after the installation below.

And then we put in lights.

Just card it directly on that light panel.

And then we put in lights. Just card it directly on that light panel.

Just card it up.

This is done normally.

Just card it up. This is done normally.

You don't need to move the tube above.

That's it. The whole thing.

Installation completed. Thank you for watching.
