The ways to adjust the door

- Before adjusting the hinge, please check whether the cabinet is skewed.
- If the skew can not be epaired, please remove the anti-tipping device first, then adjust the cabinet to vertical position.
- Please adjust the hinge with the door open.
- Please operate it with more than 2 people, one person holds the door and the other one adjusts the screw.

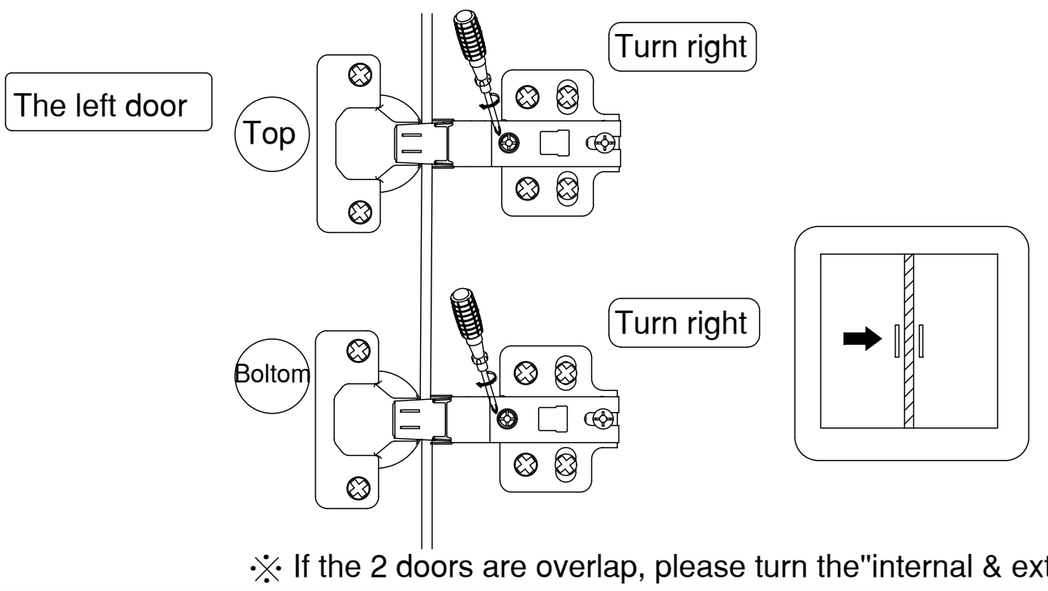

Components Name

Obvious gaps between doors or Doors don't look closed

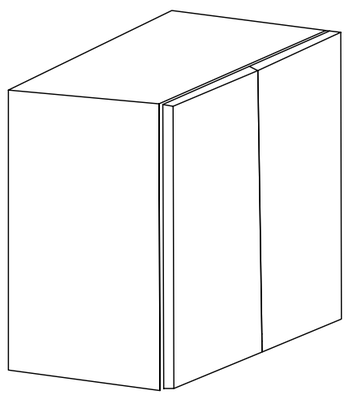

1 Turn"internal & external screw" fo the right can make the door approach inside.
Please adjust the doors little by little..

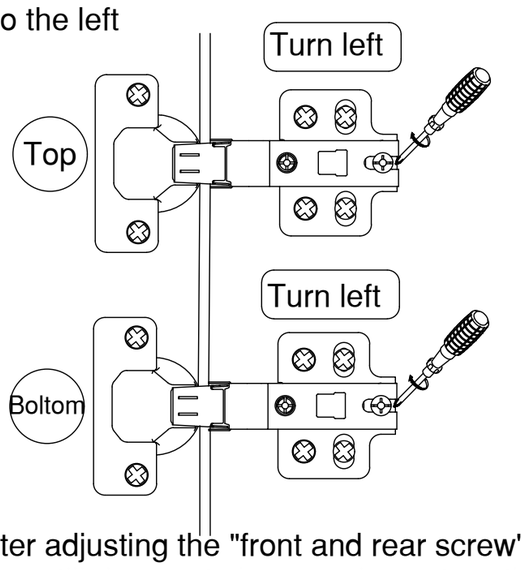

※ If the 2 doors are overlap, please turn the"internal & external screw" to the left.

When door is crooked

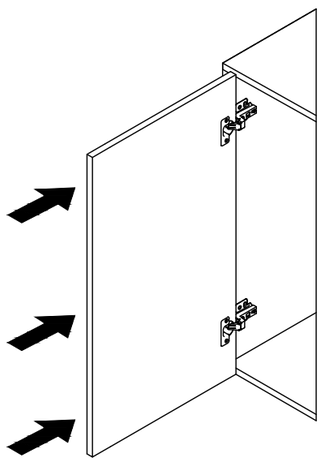

Please take the following steps to adjust first.

1 Rotate the "font and rear screws to the left

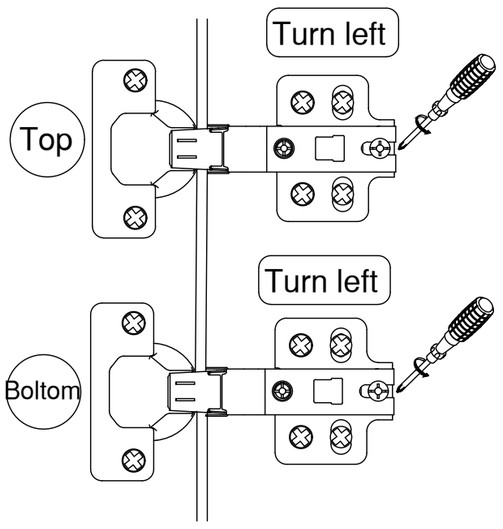

※ After adjusting the "front and rear screw", the door still does not change, please turn the" internal & external screw" to the right Slightly.

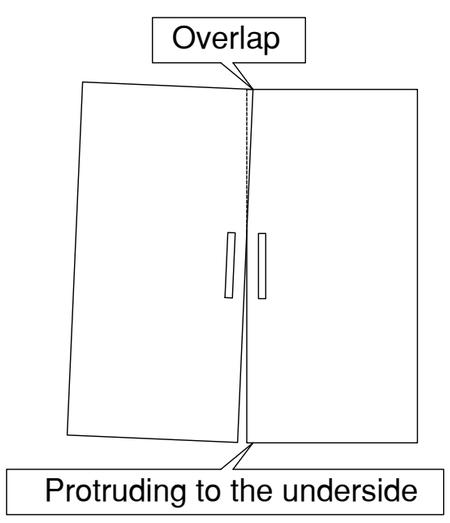

2 Push the door to the cabinet

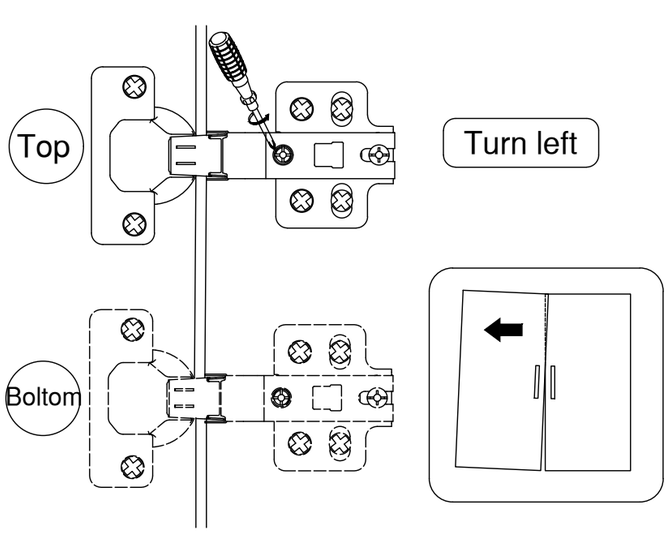

3 Rotate the "font and rear screws to the right

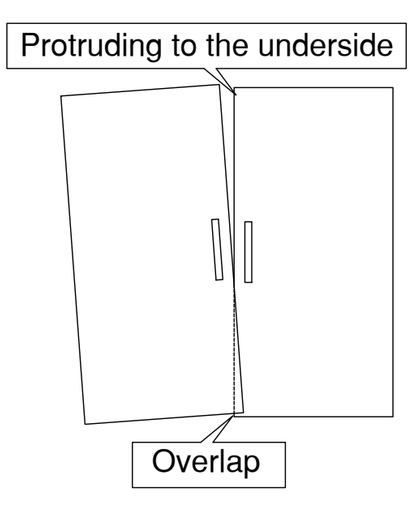

When door is leaning

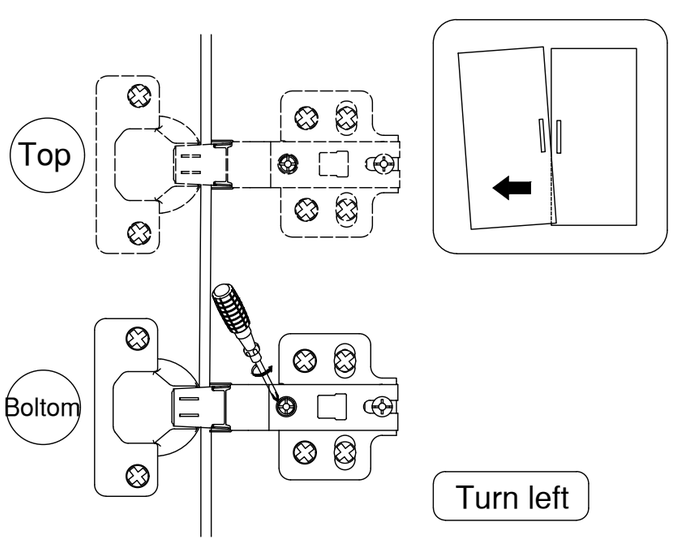

1 Turn "intemal & external screw" to the left can make the top of the door tilted outward.

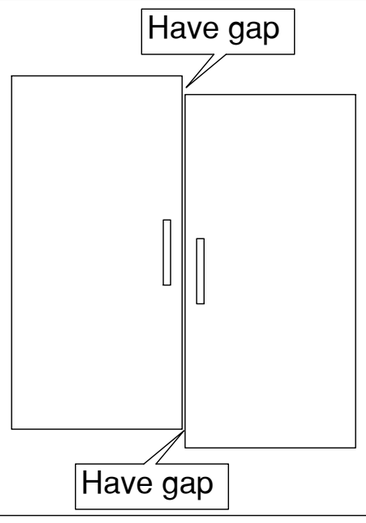

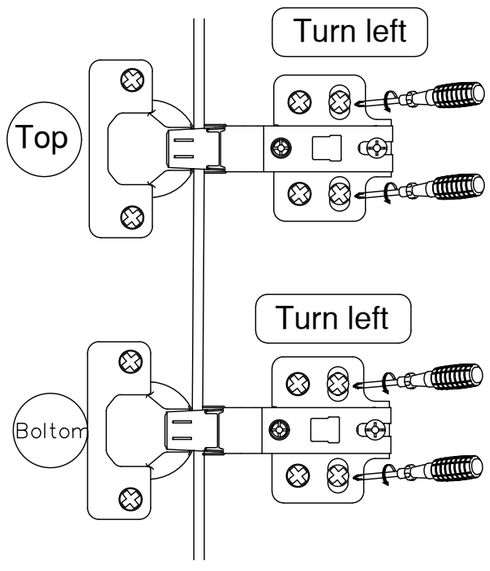

2 Turn "intemal & external screw" to the left can make the top of the door tilted outward.

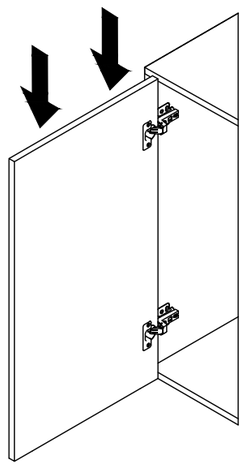

When door is higher on top

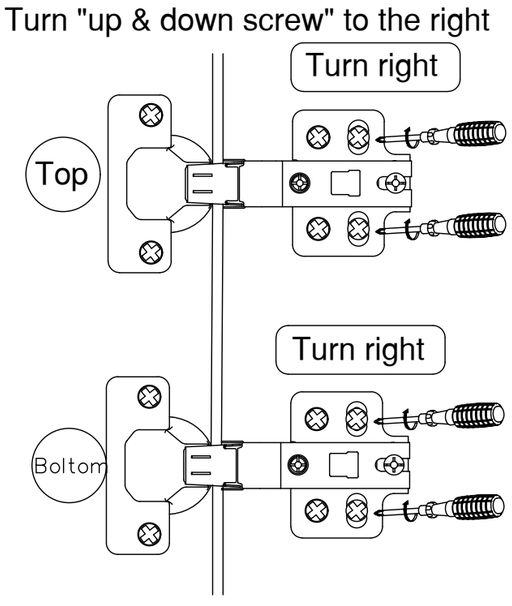

1 Turn "up & down screw" to the left

2 Lower the door's height so that 2 doors are of thesame height.

3 Turn "up & down screw" to the right

※ if the door is lower on bottom, piease lift up the left door slightly on step 2
