KEEP new and used batteries **OUT OF REACH** of **CHILDREN**.
Seek immediate medical attention if a battery is suspected to be swallowed or inserted inside any part of the body.
If the battery compartment does not close securely, stop using the product and keep it away from children.

If a battery has been ingested, or there is a possibility one might have been ingested, please seek medical attention and inform the medical authorities that you suspect battery ingestion.

It's not always clear when a child has swallowed a button battery, as there are no specific symptoms. However, they might:

- cough, gag, or drool;
- seem to have a stomach bug or virus;
- vomit;
- complain of pain in their stomach, chest, or throat;
- appear tired or sluggish; and
- lose their appetite.

Since the signs aren't obvious, it's important to keep a close eye on loose, used, or spare button batteries in your home, as well as the products that contain them.
